<i>Preface</i>	<i>page vii</i>
1 Introduction and overview	1
2 The surface of a simple polymer melt	8
2.0 Introduction	8
2.1 Surface tension and surface energy	8
2.2 Interfacial tensions, contact angle and wetting	12
2.3 More precise theories of the surface tension of simple fluids	25
2.4 Theories of the surface tension of polymers	33
2.5 Surface tension of polymer melts: the experimental situation and comparison with theory	36
2.6 The polymer surface at a microscopic level	44
2.7 Dynamics of the polymer surface	50
2.8 References	54
3 Experimental techniques	56
3.0 Introduction	56
3.1 Reflection of waves from interfaces	58
3.2 Ion beam methods	87
3.3 Surface spectroscopy	101
3.4 Direct measurement of forces between surfaces	107
3.5 References	123
4 Polymer/polymer interfaces	127
4.0 Introduction	127
4.1 Thermodynamics of polymer mixtures	128
4.2 Interfaces between weakly immiscible polymers: square gradient theories	136
4.3 Self-consistent field theory	144
4.4 Kinetics of formation of polymer/polymer interfaces	152

4.5	The morphology of immiscible polymer blends	172
4.6	Appendix to chapter 4. The random phase approximation	181
4.7	References	184
5	Adsorption and surface segregation from polymer solutions and mixtures	187
5.0	Introduction	187
5.1	Surface segregation in polymer mixtures	188
5.2	Adsorption from polymer solutions	199
5.3	Wetting and surface-driven phase separation in polymer solutions and mixtures	227
5.4	References	241
6	Tethered polymer chains in solutions and melts	244
6.0	Introduction	244
6.1	Polymer brushes in solution	245
6.2	Polymer brushes in melts	261
6.3	Block copolymers at polymer/polymer interfaces	268
6.4	Other interfacially active species at polymer/polymer interfaces	277
6.5	Phase behaviour of neat block copolymers in bulk and in thin films	282
6.6	References	290
7	Adhesion and the mechanical properties of polymer interfaces at the molecular level	293
7.0	Introduction	293
7.1	The strength of interfaces involving glassy polymers	295
7.2	The strength of interfaces involving rubbery polymers	309
7.3	References	315
8	Polymers spread at air/liquid interfaces	317
8.0	Introduction	317
8.1	Surface pressure isotherms: classification, theory and scaling laws	317
8.2	Organisation of polymers at the air/liquid interface	328
8.3	Interfacial dynamics of polymers at fluid interfaces	347
8.4	A generalised approach to capillary wave phenomena	356
8.5	Other effects and future applications	364
8.6	References	369
	<i>Index</i>	373
