Preface	1
Preface to the second edition	3
Chapter 1. Wightman axioms and vertex algebras	5
1.1. Wightman axioms of a QFT	5
1.2. $d = 2$ QFT and chiral algebras	8
1.3. Definition of a vertex algebra	13
1.4. Holomorphic vertex algebras	15
Chapter 2. Calculus of formal distributions	17
2.1. Formal delta-function	17
2.2. An expansion of a formal distribution $a(z, w)$ and formal Fourier transform	19
2.3. Locality of two formal distributions	24
2.4. Taylor's formula	29
2.5. Current algebras	31
2.6. Conformal weight and the Virasoro algebra	34
2.7. Formal distribution Lie superalgebras and conformal superalgebras	39
2.8. Conformal modules and modules over conformal superalgebras	50
2.9. Representation theory of finite conformal algebras	56
2.10. Associative conformal algebras and the general conformal algebra	61
2.11. Cohomology of conformal algebras	67
Chapter 3. Local fields	81
3.1. Normally ordered product	81
3.2. Dong's lemma	84
3.3. Wick's theorem and a "non-commutative" generalization	87

3.4. Bounded and field representations of formal distribution Lie superalgebras	91
3.5. Free (super)bosons	93
3.6. Free (super)fermions	98
Chapter 4. Structure theory of vertex algebras	103
4.1. Consequences of translation covariance and vacuum axioms	103
4.2. Skewsymmetry	105
4.3. Subalgebras, ideals, and tensor products	106
4.4. Uniqueness theorem	108
4.5. Existence theorem	110
4.6. Borcherds OPE formula	111
4.7. Vertex algebras associated to formal distribution Lie superalgebras	113
4.8. Borcherds identity	116
4.9. Graded and Möbius conformal vertex algebras	119
4.10. Conformal vertex algebras	125
4.11. Field algebras	129
Chapter 5. Examples of vertex algebras and their applications	133
5.1. Charged free fermions and triple product identity	133
5.2. Boson-fermion correspondence and KP hierarchy	137
5.3. \widehat{gl}_∞ and $W_{1+\infty}$	143
5.4. Lattice vertex algebras	148
5.5. Simple lattice vertex algebras	152
5.6. Root lattice vertex algebras and affine vertex algebras	158
5.7. Conformal structure for affine vertex algebras	161
5.8. Super boson-fermion correspondence and sums of squares	168
5.9. Superconformal vertex algebras	178
5.10. On classification of conformal superalgebras	185
Bibliography	193
Index	199
