Preface	vii
Introduction and Overview	1
<i>M. M. Rao</i>	
1 Transport Properties of Gaussian Velocity Fields	9
<i>René A. Carmona</i>	
1.1 Introduction	9
1.2 Gaussian Velocity Fields	12
1.3 Infinite-Dimensional Ornstein-Uhlenbeck Processes	16
1.4 Transport Problems	23
1.5 Numerical Simulations	31
1.6 The Case of White Velocity Fields	37
1.7 Open Mathematical Problems	43
1.8 Stochastic Flows and SPDEs	45
Bibliography	53
2 Planar Stochastic Integration Relative to Quasimartingales	65
<i>Michael L. Green</i>	
2.1 Introduction	65
2.2 The Bochner Bounding Measure for V -Quasimartingales	74
2.3 Line Integrals	95
2.4 The Mixed Integral	118
2.5 The Double Integral	123
2.6 The J_X -Measure	135
2.7 A Stochastic Green Theorem	145
Bibliography	157
3 Probability Metrics and Limit Theorems in AIDS	
Epidemiology	159
<i>S. T. Rachev, V. Haynatzka, and G. Haynatzki</i>	
3.1 Introduction	160
3.2 The Monge-Kantorovitch Problem and Probability Metrics	166
3.3 Ideal Metrics	183
3.4 Spread of AIDS Among Drug Users and Probability Metrics	200
3.5 The Spread of AIDS Among Interactive Transmission Groups	208
Bibliography	217

4 Higher Order Stochastic Differential Equations	225
<i>M. M. Rao</i>	
4.1 Introduction	225
4.2 Stochastic Integrals and Boundedness Principles	227
4.3 Linear Stochastic Differential Equations	232
4.4 Higher Order Nonlinear Equations	245
4.5 Infinitesimal Characteristics of Solutions	253
4.6 Refined Analysis with Brownian Noise	263
4.7 Operator Representation of the V -Process	277
4.8 Sample Path Behavior for Large Time	286
4.9 Aspects of Stochastic Flows	290
4.10 Multiparameter Analogs and SPDEs	292
Bibliography	301
5 Some Aspects of Harmonizable Processes and Fields	303
<i>Randall J. Swift</i>	
5.1 Introduction	303
5.2 Preliminaries	304
5.3 Part I: Second Order Nonstationary Processes Including the Harmonizable Class	307
5.4 Part II: Some Classes of Harmonizable Random Fields	327
Bibliography	361
6 On Singularity and Equivalence of Gaussian Measures	367
<i>N. Vakhania, and V. Tarieladze</i>	
6.1 Definitions and Auxiliary Results	368
6.2 Kakutani's Theorem	372
6.3 Gaussian Measures on \mathbb{R}	375
6.4 General Gaussian Measures	376
6.5 The Case of Topological Vector Spaces	384
Bibliography	387
Index	391
