

# CONTENTS

<b>1. Preliminaries</b>	<b>1</b>
Measure and Integration . . . . .	3
Banach Spaces . . . . .	5
Hilbert Space and Fourier Series . . . . .	8
<b>2. Fourier Series</b>	<b>15</b>
Cesaro Means . . . . .	16
Characterization of Types of Fourier Series . . . . .	22
Notes . . . . .	24
Exercises . . . . .	25
<b>3. Analytic and Harmonic Functions in the Unit Disc</b>	<b>27</b>
The Cauchy and Poisson Kernels . . . . .	28
Boundary Values . . . . .	32
Fatou's Theorem . . . . .	34
$H^p$ Spaces . . . . .	39
Notes . . . . .	39
Exercises . . . . .	40
<b>4. The Space <math>H^1</math></b>	<b>42</b>
The Helson-Lowdenslager Approach . . . . .	42
Szegő's Theorem . . . . .	48
Completion of the Discussion of $H^1$ . . . . .	50
Dirichlet Algebras . . . . .	54
Notes . . . . .	57
Exercises . . . . .	58
<b>5. Factorization for <math>H^p</math> Functions</b>	<b>61</b>
Inner and Outer Functions . . . . .	61
Blaschke Products and Singular Functions . . . . .	63
The Factorization Theorem . . . . .	67
Absolute Convergence of Taylor Series . . . . .	70
Remarks on the Classical Approach . . . . .	72

Functions of Bounded Characteristic . . . . .	73
Notes . . . . .	74
Exercises. . . . .	74
<b>6. Analytic Functions with Continuous Boundary Values</b>	<b>77</b>
Conjugate Harmonic Functions . . . . .	78
Theorems of Fatou and Rudin . . . . .	80
The Closed Ideals of $A$ . . . . .	82
Commutative Banach Algebras . . . . .	89
Wermer's Maximality Theorem . . . . .	93
Notes . . . . .	95
Exercises. . . . .	95
<b>7. The Shift Operator</b>	<b>98</b>
The Shift Operator on $H^2$ . . . . .	98
More about Dirichlet Algebras . . . . .	101
Invariant Subspaces for $H^2$ of the Half-plane . . . . .	103
Isometries . . . . .	108
The Shift Operator on $L^2$ . . . . .	111
The Vector-valued Case . . . . .	114
Representations of $H^\infty$ . . . . .	116
Notes . . . . .	119
Exercises. . . . .	119
<b>8. <math>H^p</math> Spaces in a Half-plane</b>	<b>121</b>
$H^p$ of the Half-plane . . . . .	121
Boundary Values for $H^p$ Functions . . . . .	124
The Paley-Wiener Theorem . . . . .	131
Factorization for $H^p$ Functions in a Half-plane . . . . .	132
Notes . . . . .	133
Exercises. . . . .	133
<b>9. <math>H^p</math> as a Banach Space</b>	<b>136</b>
Extreme Points . . . . .	136
Isometries . . . . .	142
Projections from $L^p$ to $H^p$ . . . . .	149
Notes . . . . .	155
Exercises. . . . .	156
<b>10. <math>H^\infty</math> as a Banach Algebra</b>	<b>158</b>
Maximal Ideals in $H^\infty$ . . . . .	159
Topological Structure of $\mathfrak{M}(H^\infty)$ . . . . .	162
Discs in Fibers . . . . .	166

$L^\infty$ as a Banach Algebra . . . . .	169
The Šilov Boundary . . . . .	172
Inner Functions and the Šilov Boundary . . . . .	175
Representing Measures and Annihilating Measures . . . . .	180
Algebras on the Fibers. . . . .	187
Maximality . . . . .	193
Interpolation . . . . .	194
Notes . . . . .	206
Exercises. . . . .	207
<b>Bibliography</b>	209
<b>Index</b>	215
