

## INTRODUCTION

CHAPTER 1 - GENERALIZED FUNCTIONS ON AN OPEN SUBSET OF $E_n$ .....	1
§ 1.1 The original definition.....	1
§ 1.2 An elementary definition.....	6
§ 1.3 Local properties, restrictions and compositions.....	21
§ 1.4 Nonlinear properties of generalized functions.....	27
§ 1.5 Pointvalues and integration theory.....	30
§ 1.6 Association processes.....	34
§ 1.7 Topologies on $\overline{\mathbb{C}}$ and $\mathcal{G}(\Omega)$ .....	40
§ 1.8 The subspace $\mathcal{G}_s(\Omega)$ .....	45
§ 1.9 Heaviside generalized functions.....	49
§ 1.10 Generalized solutions of algebraic differential equations and classical solutions.....	55
APPENDIX-A survey on products of distributions.....	65
CHAPTER 2 - GENERALIZED FUNCTIONS ON AN ARBITRARY SUBSET OF $E_n$ ..	69
§ 2.1 Generalized functions on the closure of an open set....	69
§ 2.2 Essential facts concerning $C^\infty$ functions in the sense of Whitney.....	70
§ 2.3 Generalized functions on an arbitrary subset of $E_n$ ....	72
§ 2.4 Whitney's extension theorem for generalized functions..	74
§ 2.5 Borel's theorem for generalized functions.....	75
§ 2.6 Extension of a generalized function defined on a half- space.....	80

CHAPTER 3 - GENERALIZED SOLUTIONS OF NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS.....	83
§ 3.1 Explicit computations for shock wave solutions of systems in nonconservative form.....	83
§ 3.2 Discontinuous solutions of the Cauchy problem for a system in nonconservative form.....	89
§ 3.3 A new formulation of the equations of Hydrodynamics....	106
§ 3.4 Jump formulas for shock waves in Elasticity and Elastoplasticity.....	114
§ 3.5 Existence-uniqueness for semilinear hyperbolic systems with irregular Cauchy data.....	121
§ 3.6 Existence-uniqueness for a nonlinear parabolic equation with irregular Cauchy data.....	133
APPENDIX 1 - Systems used by engineers for numerical simulations of collisions.....	142
APPENDIX 2 - Numerical tests in a system in nonconservative form.	148
APPENDIX 3 - Numerical tests in fluid dynamics.....	157
APPENDIX 4 - Numerical tests in models of elastoplasticity.....	175
APPENDIX 5 - Semilinear hyperbolic systems with irregular coefficients and systems of equations in Acoustics..	190
BIBLIOGRAPHIC NOTES.....	198
REFERENCES.....	201
ALPHABETICAL INDEX.....	212
