

CONTENTS

1.	MATRICES	1
	1.0. Functional analysis	1
	1.1. Introduction	2
	1.2. Notation	3
	1.3. Conservative and regular	5
	1.4. Associativity	7
	1.5. The algebras Γ and Δ	9
	1.6. Coregular and conull matrices	10
	1.7. Types of summability theorems	11
	1.8. Inverses	17
2.	CLASSICAL MATRICES	21
	2.0. Background	21
	2.1. Introduction	21
	2.2. Hölder matrices	22
	2.3. Hausdorff matrices	22
	2.4. Cesàro and Hölder	30
	2.5. Nörlund matrices	32
	2.6. Polynomial matrices	35
3.	TRIANGLES AND BANACH SPACE	39
	3.0. Functional analysis	39
	3.1. Historical	39
	3.2. Convergence domain	40
	3.3. The perfect part	41
	3.4. When c is closed	45
	3.5. Bounded sequences and non-triangles	47
4.	FK SPACES	51
	4.0. Functional Analysis	51
	4.1. Introduction	52
	4.2. FK spaces	54
	4.3. Construction	60
	4.4. Dual space	66
	4.5. Complements	68
	4.6. Coregular and conull	70
	4.7. The FK program	73

5.	REPLACEABILITY AND CONSISTENCY	75
5.1.	Functional analysis	75
5.2.	Replaceability	76
5.3.	Consistency	81
5.4.	Reversible matrices	82
5.5.	Row-finite and one to one	85
5.6.	Bounded consistency	86
6.	BIGNESS THEOREMS	89
6.0.	Functional analysis	89
6.1.	c not closed	90
6.2.	Two-norm convergence and W	93
6.3.	Oscillation	95
6.4.	Conull spaces	97
6.5.	Coregular spaces and matrices	99
6.6.	Subspace of ℓ^∞	101
6.7.	Bigness	102
7.	SEQUENCE SPACES	103
7.0.	Functional analysis	103
7.1.	Monotone norms	104
7.2.	Duals	105
7.3.	Nine spaces	109
7.4.	Determining sets	111
8.	INCLUSION AND MAPPING	115
8.0.	Functional analysis	115
	TABLE	116
8.1.	Introduction	117
8.2.	Inclusion	118
8.3.	Mapping theorems	120
8.4.	Examples	126
8.5.	Mapping concluded	132
8.6.	Functional dual	138
9.	SEMICONSERVATIVE SPACES AND MATRICES	141
9.1.	Introduction	141
9.2.	Semiconservative spaces	141
9.3.	Coregular and conull	144
9.4.	Matrix domains	147
9.5.	Matrices	149
9.6.	Coregular and conull matrices	153
10.	DISTINGUISHED SUBSPACES OF FK SPACES	157
10.0.	Functional analysis	157

10.1.	Duals as BK spaces	157	
10.2.	Distinguished subspaces	160	
10.3.	The subspace B	165	
10.4.	The subspace F	173	
10.5.	The subspace W	176	
10.6.	Basis	177	
11.	EXTENSION		179
11.0.	Functional analysis	179	
11.1.	Row functions	179	
11.2.	Matrices	183	
12.	DISTINGUISHED SUBSPACES OF MATRIX DOMAINS		187
12.0.	Functional analysis	187	
12.1.	Matrix domains	187	
12.2.	Associativity	191	
12.3.	AK spaces	191	
12.4.	Weak and strong convergence	194	
12.5.	c-like spaces	197	
13.	DISTINGUISHED SUBSPACES OF c_A		201
13.1.	B and the perfect part	201	
13.2.	The inset and replaceability	202	
13.3.	The main theorem	211	
13.4.	Applications	213	
13.5.	Almost coregular and very conull	218	
14.	THE FUNCTIONAL μ		221
14.0.	Functional analysis	221	
14.1.	Parts of the dual	222	
14.2.	The functional μ	224	
14.3.	The strong topology	225	
14.4.	μ spaces	228	
14.5.	AB and closure of X^B	229	
15.	THE SUBSPACE P		233
15.0.	Functional analysis	233	
15.1.	T and the test functions	233	
15.2.	The subspace P	235	
15.3.	Factorization	239	
15.4.	Inclusion and invariance	241	
15.5.	Replaceability	245	
15.6.	Miscellany and questions	247	
16.	SEQUENTIAL COMPLETENESS AND SEPARABILITY		251
16.0.	Functional analysis	251	

16.1.	Sequential completeness	252	
16.2.	Separability	255	
16.3.	Dense subspaces of l^∞	258	
17.	MAPS OF BANACH SPACES		263
17.0.	Functional analysis	263	
17.1.	Matrix maps of c	164	
17.2.	Maps of c	265	
17.3.	The dual map	266	
17.4.	w-matrices	269	
17.5.	w-almost matrices	270	
17.6.	Tauberian maps	274	
17.7.	Multiplicative abstracted	277	
18.	ALGEBRA		281
18.0.	Functional analysis	281	
18.1.	Topological divisors of 0	282	
18.2.	The maximal group	184	
18.3.	The spectrum	287	
19.	MISCELLANY		291
19.0.	Functional analysis	291	
19.1.	What can Y_A be?	291	
19.2.	Toeplitz basis	293	
19.3.	Miscellany	296	
19.4.	Applications	297	
19.5.	Questions	299	
19.6.	History	300	
	BIBLIOGRAPHY	303	
	INDEX	309
