

## TABLE OF CONTENTS

FOREWORD TO THE AMERICAN EDITION	vii
FOREWORD	ix
CHAPTER I. IMBEDDED, INTERMEDIATE, AND INTERPOLATION BANACH SPACES	1
1. Imbedding of Banach spaces	1
2. Dual spaces of imbedded Banach spaces	6
3. Intermediate Banach spaces	9
4. Interpolation spaces and interpolation triples	18
CHAPTER II. INTERPOLATION IN SPACES OF MEASURABLE FUNCTIONS	39
Introduction	39
1. Positive functions on a semiaxis and their dilation functions	46
2. Rearrangements of measurable functions	58
3. Operators in the Banach couple $L_1(0, \infty)$ , $L_\infty(0, \infty)$	77
4. Symmetric spaces. Interpolation between $L_1$ and $L_\infty$	90
5. Lorentz and Marcinkiewicz spaces	107
6. Operators of weakened and weak type	124
7. The singular Hilbert operator	150
8. Interpolation theorems for spaces with different measures	156
9. Applications to the theory of orthogonal series	173
CHAPTER III. SCALES OF BANACH SPACES	187
1. Scales of Banach spaces. Related spaces	187
2. Maximal and minimal normal scales	192
3. The scale of Hölder spaces	200

CHAPTER IV. INTERPOLATION METHODS	209
Introduction	209
1. The complex method of interpolation	214
2. The methods of constants and means ( $\mathfrak{K}$ - and $\mathfrak{J}$ -methods)	246
CHAPTER V (BY S. G. KREĬN). INTERPOLATION IN SPACES OF SMOOTH FUNCTIONS	283
1. Interpolation spaces constructed from an unbounded operator and a smoothing approximation process	283
2. Trace theory	309
3. Spaces of smooth functions of $n$ variables	322
NOTES ON THE LITERATURE	349
BIBLIOGRAPHY	355
SUBJECT INDEX	373
NOTATION INDEX	375
