Preface	ix
Introduction	1
I Finite Rank Operators	
1 Trace and determinant for finite rank operators	5
2 Properties of the trace and determinant	7
3 Representations of the trace and determinant	8
4 Uniqueness of the trace and determinant	10
5 Von Koch form of the determinant	12
6 Fredholm form of the determinant	14
7 Plemelj-Smithies formulas	15
8 Polynomial operator pencils	17
9 Inversion formulas	20
10 Comments	23
II Continuous Extension of Trace and Determinant	
1 Extension problems and embedded algebras	25
2 Main theorems	26
3 Analyticity of the determinant and the Plemelj-Smithies formulas	29
4 Lipschitz conditions	31
5 Several remarks	33
6 Connections between the zeros of the determinant and the eigenvalues of an operator	34
7 Determinants of infinite matrices in Von Koch form	35
8 Comments	38
III First Examples	
1 The Poincaré determinant	39
2 Hill's method	40
3 The Von Koch-Riesz algebra	42
4 The Mennicken-Wagenführer algebra	43
5 The algebra $\mathcal{D}(\ell_1)$	45
6 Comments	45

IV Trace Class and Hilbert-Schmidt Operators in Hilbert Space

1	Preliminaries	47
2	Singular numbers	49
3	Inequalities for eigenvalues, diagonal elements and singular numbers	52
4	Additional inequalities for singular numbers	56
5	Ideal of trace class operators	59
6	Lidskii trace theorem	63
7	Hilbert-Schmidt operators	66
8	Tests of nuclearity for integral operators with continuous and Hilbert-Schmidt kernels	70
9	Integral operators with smooth kernels	78
10	Polynomial operator pencils	83
11	Classes \mathcal{S}_p	87
12	Comments	90

V Nuclear Operators in Banach Spaces

1	The Ruston-Grothendieck algebra of nuclear operators	91
2	Examples of nuclear operators in Banach spaces	97
3	Grothendieck trace theorem	102
4	Asymptotic behavior of eigenvalues of nuclear operators	106
5	Comments	109

VI The Fredholm Determinant

1	The Fredholm determinant for integral operators with continuous and piecewise continuous kernels	111
2	The Algebra $\mathcal{D}_\Omega(\mathcal{H})$. Hill's Method (revisited)	115
3	Diagonally modified Fredholm determinant	121
4	A modification of the Plemelj-Smithies formula	124
5	Integral Operators in $L_1(T, \sum, \mu)$	126
6	Systems of integral equations	127
7	Comments	132

VII Possible Values of Traces and Determinants. Perelson Algebras

1	Perelson algebras	133
2	Possible values of traces and determinants in Perelson algebras	137
3	Possible values in $D_\Omega(\mathcal{H})$	139
4	Comments	141

VIII Inversion Formulas

1	General inversion formulas	143
2	Explicit formulas for resolvents of integral operators	145
3	Homogeneous integral equations	152
4	Comments	157

IX	Regularized Determinants	
1	Extension problems	159
2	The main (extension) theorems for regularized determinants . . .	162
3	Analyticity, Plemelj-Smithies formulas	166
4	Comments	168
X	Hilbert-Carleman Determinants	
1	Integral operators with degenerate kernels	169
2	Integral operators on a class of Banach spaces	172
3	Hilbert-Schmidt integral operators	176
4	Mikhlin-Itskovich algebra	177
5	Algebra \mathcal{E}_1	179
6	Diagonally modified Hilbert-Carleman determinant	180
7	Hilbert-Carleman determinant for infinite matrices	183
8	Comments	186
XI	Regularized Determinants of Higher Order	
1	Main extension theorems	187
2	Analyticity and Plemelj-Smithies formulas	192
3	Preparation for the proof of Theorem IV.10.3	195
4	Proof of Theorem IV.10.3	199
5	Comments	200
XII	Inversion Formulas via Generalized Determinants	
1	General case	201
2	Integral equations	205
3	Systems of Hill's equations	209
4	Comments	211
XIII	Determinants of Integral Operators with Semi-separable Kernels	
1	Statement of the main theorem	213
2	Input-output representations	216
3	Cascade connection of systems	219
4	Inverse systems	222
5	Inversion of integral operators with semi-separable kernels	223
6	Indicator of integral operators	224
7	Computation of the Hilbert-Carleman and the Fredholm determinants	227
8	Spectra of integral operators with semi-separable kernels	230
9	Time invariant systems	232
10	Counting negative eigenvalues of a Hilbert-Schmidt operator via sign changes of a determinant	235
11	Comments	242

XIV Algebras without the Approximation Property	
1 A general class of algebras	243
2 Integral operators with a jump discontinuity on the diagonal	244
3 Applications to integral operators with a jump discontinuity on the diagonal	246
4 Applications to integral operators with semi-separable kernel	247
5 Comments	248
Bibliography	249
Index	253
List of Symbols	257
