

# Contents

Acknowledgments .....	IX
Notation .....	X
Introduction .....	1
<b>I Boundary Value Problems for Functional Differential Equations in One Dimension</b>	
1 Ordinary Differential Equations with Nonlocal Boundary Conditions .....	19
2 Difference Operators in One Dimension .....	26
3 The Boundary Value Problem for the Differential-Difference Equation .....	37
4 Generalized and Classical Solutions .....	53
5 Applications to Control Systems with Delay .....	71
6 The Boundary Value Problem for the Differential-Difference Equation with Degeneration .....	77
Notes .....	88
<b>II The First Boundary Value Problem for Strongly Elliptic Differential-Difference Equations</b>	
7 Some Geometrical Constructions .....	92
8 Difference Operators in the Multidimensional Case .....	96
9 Necessary and Sufficient Conditions for Strong Ellipticity .....	109
10 Solvability and Spectrum .....	122
11 Smoothness of Generalized Solutions in Subdomains .....	125
12 Smoothness of Solutions on a Boundary of Neighboring Subdomains .....	138
13 Elliptic Differential Equations with Nonlocal Conditions on Shifts of Boundary .....	147
Notes .....	159

**III Applications to the Mechanics of a Deformable Body**

14	The Elastic Model .....	161
15	Variational and Boundary Value Problems .....	166
16	Smoothness of Solutions .....	177
17	The One-Dimensional Case .....	180
	Notes .....	185

**IV Semi-Bounded Differential-Difference Operators with Degeneration**

18	Self-Adjoint Extension of a Semi-Bounded Differential-Difference Operator .....	187
19	The Spectrum of Semi-Bounded Differential-Difference Operators .....	193
20	Smoothness of Solutions of Equations with Degeneration .....	198
	Notes .....	209

**V Nonlocal Elliptic Boundary Value Problems**

21	Nonlocal Elliptic Problems with a Parameter .....	211
22	Elliptic Equations with Nonlocal Boundary Conditions in a Cylinder .....	218
23	Elliptic Differential-Difference Equations in a Cylinder .....	225
24	Applications to the Multidimensional Diffusion Processes .....	230
25	Elliptic Problems with Nonlocal Conditions near the Boundary and Feller Semigroups .....	240
	Notes .....	247

**Appendix**

A	Linear Operators .....	249
B	Functional spaces .....	256
C	Elliptic Problems .....	267

Bibliography .....	275
