<b>Recent Results and Open Problems on Schrödinger Operators, Laplace Integrals, and Transfer Operators in Large Dimension</b>	<b>11</b>	
<i>B. Helffer</i>		
1	Introduction . . . . .	12
1.1	On the way of a program by M. Kac . . . . .	12
1.2	Presentation of the mathematical problems . . . . .	12
1.3	Our main toy models . . . . .	15
1.4	Contents of the survey . . . . .	16
2	Problems in statistical mechanics . . . . .	18
2.1	The Curie-Weiss model . . . . .	18
2.2	The 1-d Ising model . . . . .	19
2.3	The 2-d Ising model . . . . .	21
2.4	A simple quantum model . . . . .	23
2.5	The Kac model A . . . . .	25
2.6	The multiexponential model . . . . .	28
2.7	Comments . . . . .	30
3	Laplace integrals . . . . .	31
3.1	From spin models to Laplace integrals . . . . .	31
3.2	Classical Laplace methods . . . . .	33
3.3	Laplace integrals in large dimension: the thermodynamic limit Thermodynamic limit . . . . .	35
	Exponential convergence . . . . .	40
	Sketch of the proof of the main Theorem . . . . .	43
3.4	Around the Maximum Principle . . . . .	45
3.5	Laplace integrals in large dimension: decay of the correlations	49
3.6	Around Brascamp-Lieb inequalities . . . . .	54
3.7	FKG inequalities . . . . .	57
3.8	Laplace integrals in large dimensions: semiclassical aspects . . . . .	59

---

	The formal Laplace's method . . . . .	59
	Formal expansion of the thermodynamic limit . . . . .	64
	Semiclassical expansions for the thermodynamic limit . . . . .	68
3.9	Other semiclassical aspects . . . . .	72
4	Universal analysis for the Schrödinger operator . . . . .	76
4.1	Universal estimate of the splitting . . . . .	76
4.2	Logconcavity of the first eigenfunction . . . . .	77
4.3	Thermodynamic limit: existence and speed of convergence . . . . .	80
5	Semiclassical analysis for the Schrödinger operator . . . . .	85
5.1	Introduction . . . . .	85
5.2	The thermodynamic limit: semiclassical expansions . . . . .	85
5.3	Splitting in the semiclassical context . . . . .	87
5.4	Presentation of the rigorous results in the large dimension semi-classical case for the (DK) model . . . . .	92
5.5	The harmonic approximation . . . . .	98
5.6	WKB approximation in an $\ell^\infty$ -ball . . . . .	108
5.7	Exponentially weighted estimates for the eigenfunctions . . . . .	114
6	From statistical mechanics to quantum mechanics . . . . .	124
6.1	Introduction . . . . .	124
6.2	A link between statistical mechanics and quantum mechanics . .	126
6.3	Study of the zero spacing limit . . . . .	130
6.4	Comparison between $\exp -t(-\Delta + V)$ and $\exp -\frac{t}{2}V \cdot \exp t\Delta \cdot \exp -\frac{t}{2}V$ . . . . .	135
	Some preliminaries . . . . .	135
	Study of the Kac's operator . . . . .	136
	Study of $\exp -t(-\Delta + V)$ . . . . .	138
	Conclusion . . . . .	138
6.5	Semiclassical computations around the transfer operator . . . . .	139
7	Around the Kac operator . . . . .	141
7.1	Introduction . . . . .	141
7.2	The general Maximum Principle of Sjöstrand, new examples . .	143
7.3	Around logconcavity and FKG inequalities . . . . .	145
7.4	The thermodynamic limit for the Kac operator . . . . .	148
7.5	Estimates on the correlations . . . . .	149
7.6	Universal lower bound for the splitting for the Kac operator . .	150
7.7	Semiclassical aspects . . . . .	151
8	Open problems . . . . .	153
	References . . . . .	155

<b>Some Problems on Markov Semigroups</b>	<b>163</b>
<i>V. A. Liskevich and Yu. A. Semenov</i>	
Introduction . . . . .	163
1 Some preliminaries . . . . .	165
2 Fundamental properties of symmetric Markov generators . . . . .	170
3 Perturbations of symmetric Markov semigroups. I . . . . .	177
4 Non-symmetric Markov generators . . . . .	183
5 Perturbations of symmetric Markov semigroups. II . . . . .	190
6 Perturbations of symmetric Markov semigroups by potentials . . . . .	192
7 $(L^p, L^q)$ -estimates for the resolvent and the semigroup, their integral properties and related problems . . . . .	198
8 Strong and Markov uniqueness . . . . .	203
References . . . . .	212
<b>Wavelet Analysis of Partial Differential Operators</b>	<b>218</b>
<i>M. Holschneider</i>	
1 Introduction . . . . .	218
2 Wavelet analysis, the basic formulas . . . . .	221
2.1 The formulas for wavelet analysis and synthesis . . . . .	221
2.2 Relation between $\mathcal{W}$ and $\mathcal{M}$ . . . . .	222
2.3 The reproducing kernel and the cross kernel . . . . .	223
3 Wavelet transform of distributions . . . . .	224
3.1 Wavelet analysis of $\mathcal{S}_0(\mathbb{R}^n)$ . . . . .	224
3.2 The wavelet synthesis . . . . .	230
3.3 The inverse wavelet transform . . . . .	231
3.4 The reproducing kernel equation . . . . .	233
3.5 The cross kernel . . . . .	235
3.6 The $L^2$ -theory . . . . .	235
3.7 Wavelet analysis of $\mathcal{S}'(\mathbb{R}^n)$ . . . . .	237
3.8 Bounded sets in $\mathcal{S}_0(\mathbb{R}^n)$ and $\mathcal{S}'_0(\mathbb{R}^n)$ . . . . .	238
3.9 Singular support of distributions . . . . .	240
3.10 Wavelet analysis of $\mathcal{S}(\mathbb{R}^n)$ . . . . .	241
3.11 Wavelet analysis over $\mathbb{T}^n$ . . . . .	242
4 Some Banach spaces . . . . .	244
4.1 Admissible dual pairs . . . . .	250
4.2 Spaces of periodic functions . . . . .	251
4.3 Examples of admissible $B(\mathbb{H}^n)$ . . . . .	252
4.4 A priori estimates . . . . .	253
4.5 Compact embedding . . . . .	254
5 More general microlocal classes . . . . .	256
5.1 A non-Euclidian distance . . . . .	256

---

5.2	A family of neighborhoods . . . . .	258
5.3	More about well separated sets . . . . .	260
5.4	Cutting the half-space . . . . .	262
5.5	Microlocal classes . . . . .	265
5.6	Directional microlocal classes . . . . .	267
6	Operators in wavelet space . . . . .	269
6.1	Formal properties . . . . .	269
6.2	Some a priori estimates . . . . .	271
7	Operator algebras . . . . .	273
7.1	Convolution estimates . . . . .	273
7.2	The highly regular Calderón Zygmund operators (CZO) . . . . .	276
7.3	Fourier multipliers as highly regular CZO . . . . .	279
7.4	Singular integrals as highly regular CZO . . . . .	280
7.5	The smoothing operators . . . . .	282
7.6	The small scale averaging operators . . . . .	286
8	The algebra of smoothly varying space-scale convolution operators . . . . .	288
8.1	The Toeplitz operators . . . . .	296
8.2	A simplification . . . . .	299
8.3	The algebra of local wavelet changing operators . . . . .	301
9	Relation with some classical operators . . . . .	304
9.1	The pseudo-differential operators . . . . .	305
10	Elliptic regularity . . . . .	308
10.1	Elliptic operators . . . . .	308
10.2	Directional elliptic regularity in domains with cusps . . . . .	310
11	The diffeomorphism in wavelet space . . . . .	311
11.1	The locally linear approximation . . . . .	314
11.2	Transformation behavior of the directional micro-local classes . . . . .	315
12	The essential spectrum of some Fourier integral operators . . . . .	315
12.1	Definition of the transfer operator . . . . .	315
12.2	A formula for the essential spectral radius . . . . .	317
12.3	An abstract formula for $\rho_{ess}$ . . . . .	318
12.4	The essential spectrum of $\mathcal{L}$ . . . . .	322
12.5	A more explicit formula for $\rho_{ess}(\mathcal{L})$ . . . . .	325
12.6	A simpler upper bound . . . . .	331
12.7	The case $\Lambda_\gamma(\mathbb{T}^n)$ . . . . .	332
13	Appendix . . . . .	335
A.1	On the modulus of continuity . . . . .	335
A.2	Inverse theorems for global regularity . . . . .	337
A.3	The class of Zygmund . . . . .	340
A.4	Inverse theorems for point-wise regularity . . . . .	342
	References . . . . .	345

<b>On the Index of Elliptic Operators on a Cone</b>	<b>348</b>
<i>B. V. Fedosov and B.-W. Schulze</i>	
Introduction . . . . .	348
1 Preliminary estimates . . . . .	350
2 A regularized trace of a product . . . . .	359
3 An algebraical index . . . . .	362
4 A topological index . . . . .	367
5 Example . . . . .	371
References . . . . .	372
<b>On Composition Series in Algebras of Pseudodifferential Operators and in Algebras of Wiener–Hopf Operators</b>	<b>373</b>
<i>B. A. Plamenevskij and V. N. Senichkin</i>	
1 Introduction . . . . .	373
2 Sufficient conditions of the triviality of fields of elementary $C^*$ -algebras	376
3 Algebras of Wiener–Hopf operators . . . . .	380
4 Algebras of pseudodifferential operators . . . . .	389
References . . . . .	403
