Contents

Preface *iii*
Contributors *ix*

1. The conference in honor of Jean Vaillant 1
Bernard Gaveau

2. Hyperbolic systems with nondegenerate characteristics 7
Tatsuo Nishitani

3. The Cauchy problem for hyperbolic operators dominated by the time function 31
Kunihiko Kajitani

4. A remark on the Cauchy problem for a model hyperbolic operator 41
Enrico Bernardi and Antonio Bove

5. Gevrey well-posedness of the Cauchy problem for systems 53
Hideo Yamahara

6. Gevrey well-posedness for pseudosymmetric systems with lower order terms 67
Lorenzo Mencherini and Sergio Spagnolo

7. Le rôle des fonctions spéciales dans les problèmes de Goursat pour des équations aux dérivés partielles à coefficients constants 83
Jaime Carvalho e Silva

8. Influence of the hyperbolic part on decay rates in 1-d thermoelasticity 89
Ya-Guang Wang and Michael Reissig

9. Integration and singularities of solutions for nonlinear second order hyperbolic equation 109
Mikio Tsuji

10. Causal evolution for Einsteinian gravitation 129
Yvonne Choquet-Bruhat

11. On the Cauchy–Kowalevskaya theorem of Nagumo type for systems 145
Waichiro Matsumoto, Minoru Murai, and Takaaki Nagase

12. Differential analysis on stratified spaces 157
B. W. Schulze and N. Tarkhanov

13. Edge Sobolev spaces, weakly hyperbolic equations, and branching of singularities 179
Michael Dreher and Ingo Witt

14. Sur les ondes superficieles de l'eau et le dévelopement de Friedrichs dans le système de coordonnées de Lagrange 199
Tadayoshi Kano and Sae Miki

15. Problème de Cauchy pour certains systèmes de Leray-Volevich du type de Schrödinger 233
Jiro Takeuchi

16. Systèmes du type de Schrödinger à raciness caractéristiques multiples 255
Daniel Gourdin

17. Smoothing effect in Gevrey classes for Schrödinger equations 269
Kunihiko Kajitani

18. Semiclassical wavefunctions and Schrödinger equation 287
Maurice de Gosson

19. Strong uniqueness in Gevrey spaces for some elliptic operators 301
F. Colombini and G. Grammatico

20. A remark on nonuniqueness in the Cauchy problem for elliptic operator having non-Lipschitz coefficients 317
Daniele Del Santo

21. Sur le prolongement analytique de la solution du problème de Cauchy 321
Yûsaku Hamada

22. On the projective descriptions of the space of holomorphic germs 331
P. Laubin

23. Microlocal scaling and extension of distributions 339
M. K. Venkatesha Murthy

24. A lower bound for atomic Hamiltonians and Brownian motion 349
A. Debiard and B. Gaveau

25. A compromised arrow of time 355
L. S. Schulman
