

# CONTENTS

## Chapter 1: INTEGRALS ASSOCIATED WITH THE KERNEL $\exp(-a\|x\|^2)$ .

- (1.1) Introduction;
- (1.2) Notation;
- (1.3) Notes on Polar Coordinates in  $R^n$ ; Representation of Integrals of Radial Functions;
- (1.4) The Gamma Function;
- (1.5) Bessel Functions;
- (1.6) Hermite Functions;
- (1.7) Integrals involving Exponential and Trigonometric Functions;
- (1.8) One-dimensional Integrals;
- (1.9) Integrals of Functions of the form  $f(|t-t^{-1}|)$ .
- (1.10) n-Dimensional Integrals;
- (1.11) Convolution Identities involving the Kernel  $\exp(-a\|x\|^2)$ .

## Chapter 2: THE WEIERSTRASS TRANSFORM $W_a(f)$ .

- (2.1) Introduction;
- (2.2) Weierstrass Transforms - Introduction;
- (2.3)  $W_a$  in  $L^p(R^n)$ ,  $p \geq 1$ ;
- (2.4) Convolution Identities and 'Semi-group Properties';
- (2.5) Identities involving Products of Weierstrass Transforms;
- (2.6) The Infinitesimal Generator of  $(W_a, a > 0)$ , and Associated Resolvent Operator;
- (2.7) Weierstrass Operators and Harmonic Functions on Euclidean Spaces;
- (2.8) Weierstrass Operators with Vector Parameters;
- (2.9) An Operators related to Conjugate Functions;
- (2.10) An Integral Operator defined in terms of Multiple Weierstrass kernels.

CONTENTS (CONTD.)Chapter 3: FOURIER TRANSFORMS AND WEIERSTRASS TRANSFORMS.

- (3.1) Introduction;
- (3.2) Fourier Transforms in  $L^2(\mathbb{R}^n)$  and  $L^p(\mathbb{R}^n)$ ,  $1 < p < 2$ ;
- (3.3) Weierstrass Operators with Complex Parameters; The Convolution kernel  $k(x) = \exp(iu\|x\|^2)$ ;
- (3.4) Representation of the Weierstrass Operators as Fourier Transform Multiplier Operators; Inversion of the Weierstrass Operators; Operators which Commute with the Fourier Operator.

Chapter 4: OPERATORS CONNECTED WITH WEIERSTRASS OPERATORS BY PARAMETER INTEGRALS.

- (4.1) Introduction;
- (4.2)  $L^p$ -estimates for Operators defined in terms of Weierstrass Operators by Parameter Integrals;
- (4.3) Representations of Operators by Parameter Integrals.
- (4.4) The Heat Equation.

Chapter 5: MISCELLANEOUS RESULTS; TRANSFORMS OF RADIAL FUNCTIONS; PARAMETER AND MAXIMAL FUNCTIONS.

- (5.1) Results involving Fourier Transforms;
- (5.2) Integrals Involving Radial Functions; Fourier Transforms Weierstrass Transforms and Convolutions of Radial Functions;
- (5.3) Parameter Integral Identities and Estimates involving Weierstrass Transforms and Fractional Integrals;
- (5.4) Estimates Involving Maximal Functions.

## CONTENTS(CONTD.)

### Chapter 6: APPENDIX.

- (6.1) Remarks;
- (6.2) The Gram-Schmidt Orthogonalization Process;
- (6.3) Lebesgue Convergence Theorem for Sequences and Series;
- (6.4) Fubini's Theorem;
- (6.5) Differentiation of the Integral;
- (6.6) Change of Variables in Integrals;
- (6.7) Hölder's Inequality;
- (6.8) Minkowski's Inequality; Minkowski's Integral Inequality;
- (6.9) Continuity of Translation Operator on  $L^p(\mathbb{R}^n)$ ;
- (6.10) Pointwise Convergence of Uniformly Bounded Operators;
- (6.11) Resolvent of Infinitesimal Generator of a Semi-group of Operators.
