Invited Addresses and Research Reports

Monotonically Convergent Upper and Lower Bounds for Classes of Conflicting Populations	3
<i>W. F. Ames</i>	
A New View on Constrained Problems	15
<i>H. A. Antosiewicz</i>	
Delay Systems in Biological Models: Approximation Techniques	21
<i>H. T. Banks</i>	
Convergence of Volterra Series on Infinite Intervals and Bilinear Approximations	39
<i>R. W. Brockett</i>	
Differential Inequalities for Liapunov Functions	47
<i>T. A. Burton</i>	
Nonlinear Oscillations	49
<i>L. Cesari</i>	

A Comparison Principle for Steady-State Diffusion Operators <i>J. Chandra and P. Wm. Davis*</i>	67
Stability or Chaos in Discrete Epidemic Models <i>K. L. Cooke,* D. F. Calef, and E. V. Level</i>	73
Analytic Methods for Approximate Solutions of Elliptic Free Boundary Problems <i>B. A. Fleishman* and T. J. Mahar</i>	95
Nonlinear Boundary Value Problems for Elliptic Systems in the Plane <i>R. P. Gilbert</i>	97
Error Propagation and Catastrophes in Protein Synthesizing Machinery <i>N. S. Goel</i>	125
Some New Applications of Popov's Frequency-Domain Method <i>A. Halanay</i>	147
Bounds for Solutions of Reaction-Diffusion Equations <i>T. G. Hallam* and E. C. Young</i>	163
Imbedding Methods for Bifurcation Problems and Post-Buckling Behavior of Nonlinear Columns <i>R. Kalaba,* K. Spingarn, and E. Zagustin</i>	173
Monotonicity and Measurability <i>R. Kannan</i>	189
Chaotic Behavior in Dynamical Systems <i>J. L. Kaplan* and F. R. Marotto</i>	199
Stability Technique and Thought Provocative Dynamical Systems <i>G. S. Ladde</i>	211
The Current Status of Abstract Cauchy Problem <i>V. Lakshmikantham</i>	219

*Indicates the author who presented the paper at the conference.

On the Method of Cone-Valued Lyapunov Functions <i>V. Lakshmikantham and S. Leela*</i>	231
Periodic Solutions of Some Integral Equations from the Theory of Epidemics <i>R. D. Nussbaum</i>	235
Some Recent Progress in Neuro-Muscular Systems <i>M. N. Ögüztörelî* and R. B. Stein</i>	257
Applications of the Saturability Technique in the Problem of Stability of Nonlinear Systems <i>V. M. Popov</i>	295
Nonlinear Evolution Equations and Nonlinear Ergodic Theorems <i>S. Reich</i>	297
On Pure Structure of Dynamic Systems <i>D. D. Siljak</i>	299
Optimizing and Extremizing Nonlinear Boundary Value Problems in Lenticular Antennas in Oceanography, Medicine and Communications: Some Solutions and Some Questions <i>R. L. Sternberg</i>	301
A Model for the Statistical Analysis of Cell Radiosensitivity during the Cell Cycle <i>J. O. Tsokos and C. P. Tsokos</i>	327
Volterra Integral Equations and Nonlinear Semigroups <i>G. F. Webb</i>	349

Contributed Papers

The Mathematical Analysis of a Four-Compartment Stochastic Model of Rose Bengal Transport through the Hepatic System <i>D. H. Anderson,* J. Eisenfeld, S. I. Saffer, J. S. Reisch, and C. E. Mize</i>	353
---	-----

* Indicates the author who presented the paper at the conference.

A More Efficient Algorithm for an Optimal Tour of a Health Care Consumer with Multiple Health Care Facilities in Each County	373
<i>A. J. G. Babu* and W. S. Hsia</i>	
Stability of Non-Compact Sets	381
<i>P. N. Bajaj</i>	
Parametric Excitation as the Means of Energy Transfer in Quantal Systems with Reference to Carcinogenesis and Bioenergetics	389
<i>T. W. Barrett</i>	
Quantum Statistical Foundations for Structural Information Theory and Communication Theory	391
<i>T. W. Barrett</i>	
Boundary Value Problems for Nonlinear Differential Equations	411
<i>T. T. Bowman</i>	
Global Solutions for a Problem of Neutron Transport with Temperature Feedback	413
<i>G. Busoni, V. Capasso,* and A. Belleni-Morante</i>	
Optimal Harvesting for the Logistic and Gompertz Growth Curve	425
<i>J. E. Chance</i>	
Maximum and Minimum Degeneracy Set of Linear Time-Invariant Delay-Differential Systems of the Neutral Type	437
<i>A. K. Choudhury</i>	
On the Controllability to Closed Sets of Nonlinear and Related Linear Systems	445
<i>E. N. Chukwu</i>	
A Discrete-time Nonlinear $(m + n)$ -Person Labor Market System with Uncertainty	447
<i>P. Coughlin</i>	

Time Delays in Predator-Prey Systems <i>J. M. Cushing</i>	469
On Selecting a Response Function in Nonlinear Regression <i>J. W. Drane</i>	473
On the Moments of Exponential Decay <i>J. Eisenfeld, * D. J. Mischelevich, R. L. Senger, and S. R. Bernfeld</i>	481
On the Steady State of an Age Dependent Model for Malaria <i>R. H. Elderkin, * D. P. Berkowitz, F. A. Farris, C. F. Gunn, F. J. Hickernell, S. N. Kass, F. I. Mansfield, and R. G. Taranto</i>	491
Abstract Volterra Equations with Infinite Delay <i>W. E. Fitzgibbon</i>	513
The Incidence of Infectious Diseases under the Influence of Seasonal Fluctuations—Analytical Approach <i>Z. Grossman, I. Gumowski, and K. Dietz</i>	525
Sum of Ranges of Operators and Applications <i>C. P. Gupta</i>	547
A Variation of Razumikhin's Method for Retarded Functional Differential Equations <i>S. R. Bernfeld and J. R. Haddock *</i>	561
A Degenerate Problem of Singular Perturbations <i>V. Dragan and A. Halanay *</i>	567
Bôcher-Osgood Type Theorems for Third Order Differential Equations <i>G. D. Jones</i>	573
On the Characterization of Macromolecular Length Distributions by Analysis of Electrical Birefringence Decay <i>M. M. Judy * and S. R. Bernfeld</i>	577

*Indicates the author who presented the paper at the conference.

Periodic Solutions and Perturbed Semigroups of Linear Operators <i>J. H. Lightbourne, III</i>	591
Speculative Demand with Supply Response Lag <i>A. A. Francis, I. H. Herron, and C. McCalla*</i>	603
A Geometrical Study of B-Cell Stimulation and Humoral Immune Response <i>S. J. Merrill</i>	611
Generalized Stability of Motion and Vector Lyapunov Functions <i>R. W. Mitchell and D. A. Pace*</i>	631
Simple Analogs for Nerve Membrane Equations <i>R. E. Plant</i>	647
Oscillations Results for a Nonhomogeneous Equation <i>S. M. Rankin, III</i>	655
The Comparison of a Four-Compartment and a Five-Compartment Model of Rose Bengal Transport through the Hepatic System <i>S. I. Saffer,* P. L. Daniel, and C. E. Mize</i>	657
Some Properties of Increasing Densifying Mappings <i>K. L. Singh</i>	671
Oscillation in a Non-Linear Parabolic Model of Separated, Cooperatively Coupled Enzymes <i>H. D. Thames, Jr.,* and D. G. Aronson</i>	687
Iterative Techniques for Inversion of the Nonlinear Perrin Equations for Diffusion of Spheriods <i>A. K. Wright* and J. E. Baxter</i>	695

*Indicates the author who presented the paper at the conference.
