

CONTENTS

Perturbation of a Nonself-Adjoint Schrödinger Operator with Discrete Spectrum A. G. Alenitsyn	1
On the Asymptotic Formula for the Discrete Spectrum of Certain Singular Differential Operators M. Sh. Birman and V. V. Borzov	19
On a Nonself-Adjoint Inverse Boundary Value Problem in Matrix Form for a Hyperbolic Differential Equation A. S. Blagoveshchenskii	31
On the Theory of the Spectral Shift Function L. S. Koplienکو	51
The Asymptotic Behavior of a Sequence of Eigenfunctions of the Laplace Operator Corresponding to a Closed Invariant Curve of the "Billiard Problem" V. F. Lazutkin	61
The Invariance Principle for Generalized Wave Operators M. B. Matveev	77
On the Joint Completeness of the System of Eigenfunctions of a Contraction and Its Adjoint B. S. Pavlov	87
Integral Representations for the Wave Operators in the Abstract Theory of Scattering S. B. Éntina	97
On the Spectrum of the Perturbed Polyharmonic Operator D. R. Yafaev	107
