

# Contents

Preface	ix
Chapter 1: Introduction and outline of contents	1
Chapter 2: Analytical preliminaries	11
2.1 Introduction	11
2.2 Preliminaries	11
2.3 Distribution theory	20
2.4 Hilbert space	35
2.5 Bounded linear operators on Hilbert spaces	41
2.6 Unbounded linear operators on Hilbert spaces	51
2.7 Adjoints of unbounded operators	57
2.8 A basic criterion for self-adjointness	60
Chapter 3: Examples of scattering theory strategies	65
3.1 Introduction	65
3.2 A free problem	69
3.3 Properties of the operators $A_0$ and $U_0(t)$	71
3.4 A perturbed problem	75
3.5 Comparison of solutions	77
3.6 Summary	80
Chapter 4: Elements of spectral theory	82
4.1 Introduction	82
4.2 Basic concepts	82
4.3 Eigenvalues and eigenvectors	85

4.4 Spectral decompositions on finite dimensional spaces	92
4.5 Spectral decomposition on infinite dimensional spaces	98
4.6 Properties of spectral families	101
4.7 Functions of an operator	108
4.8 Spectral decompositions of $H$	111
4.9 Examples	123
4.10 More on spectral decompositions associated with an operator	140
4.11 On the determination of spectral families	146
<b>Chapter 5: Some applications of semigroup theory</b>	<b>152</b>
5.1 Introduction and basic results	152
5.2 On the well-posedness of problems	158
5.3 Generators of semigroups	161
5.4 Perturbation of semigroups	167
<b>Chapter 6: More about wave operators</b>	<b>169</b>
6.1 Introduction	169
6.2 Abstract evolutionary systems	169
6.3 The scattering operator	171
6.4 Existence of wave operators	174
6.5 Selected properties of wave operators	176
6.6 On the completeness of wave operators	181
<b>Chapter 7: Target scattering</b>	<b>183</b>
7.1 Introduction	183
7.2 Concerning the incident field	183
7.3 A typical target scattering problem	185
7.4 Solution concepts	191
7.5 Concerning existence and uniqueness of solutions	194

<b>Chapter 8: A scattering theory</b>	<b>201</b>
8.1 Introduction	201
8.2 A free problem	202
8.3 A perturbed problem	209
8.4 Concerning the wave operators	216
8.5 Summary and additional comments	218
<b>Chapter 9: Nonlinear scattering theory</b>	<b>222</b>
9.1 Introduction	222
9.2 Concerning existence of solutions	225
9.3 Scattering theory	227
9.4 More on conditions ensuring scattering	236
<b>Chapter 10: Commentaries</b>	<b>240</b>
<b>References</b>	<b>246</b>
<b>Index</b>	<b>252</b>
