Contents

CHAPTER 1
A Notion of Probability 1

1.1 *Random Experiments* 1
1.2 *The Sample Space* 3
1.3 *Events* 6
1.4 *The Notion and Axioms of Probability* 10
1.5 *Elementary Properties of Probability* 12
1.6 *Equally Likely Outcomes* 18
Problems 22

CHAPTER 2
Random Variables and Their Distributions 26

2.1 *The Concept of a Random Variable* 27
2.2 *Cumulative Distribution Functions* 30
2.3 *Discrete Random Variables* 34
2.4 *Continuous Random Variables* 38
2.5 *Expectations, Means, and Variances* 45

2.6 *The Moment Generating Function* 56
Problems 60

CHAPTER 3
Elements of Combinatorial and Geometrical Probability 66
3.1 *Permutations, Combinations, and Enumeration* 66
3.2 *Combinatorial Probability* 75
3.3 *Cell Occupancy and Matching Problems* 88
3.4 *Geometric Probability* 98
Problems 102

CHAPTER 4
Conditional Probability, Bayes Theorem, and Independence 107
4.1 *Conditional Probability* 107
4.2 *Bayes Theorem* 115
4.3 *Independent Events* 118
Problems 123

CHAPTER 5
Continuous Random Variables 127
5.1 *Continuous Random Variables* 127
5.2 *Normal Random Variables* 131
5.3 *Other Important Continuous Random Variables* 142
Problems 151

CHAPTER 6
Bivariate Random Variables and Their Distributions 154
6.1 *Bivariate Random Variables and Their Joint Distributions* 155
6.2 *Joint and Conditional Distributions* 159
6.3 *The Correlation Coefficient and Regression of the Mean* 178
6.4 *Uncorrelatedness and Independence* 190
Problems 192

CHAPTER 7
Functions of Random Variables 198
7.1 *The Probability Distribution of a Function of a Random Variable* 198
7.2 *The Joint Probability Distribution of a Function of a Bivariate Random Variable* 206
7.3 *Other Types of Transformations* 220
Problems 224

CHAPTER 8
Sums of Random Variables 229
8.1 *Sums of Random Variables and Sampling Distributions* 230
8.2 *The Law of Large Numbers and the Central Limit Theorem* 242

8.3 *The Approximation of Distributions* 248
Problems 260

CHAPTER 9
Estimation 263
9.1 *Point Estimators and Their Properties* 264
9.2 *Confidence Intervals* 278
9.3 *Bayesian Estimation* 286
Problems 291

CHAPTER 10
Testing Hypotheses 294
10.1 *Testing Hypotheses* 295
10.2 *Simple Hypotheses and the Neyman–Pearson Lemma* 302
10.3 *Composite Hypotheses* 309
10.4 *Goodness of Fit Tests* 319
Problems 323

CHAPTER 11
Queueing Theory 327
11.1 *Description of Queueing Models* 328
11.2 *The Poisson Process* 329
11.3 *Birth–Death Processes and the Single Server Queue* 336
11.4 *Modifications of the Single Server Queue* 345
Problems 354

CHAPTER 12
Reliability Theory 357

12.1 *Failure Laws and Reliability* 357
12.2 *Series Connections* 365
12.3 *Parallel Connections* 369
12.4 *Life Testing and Estimation* 377
Problems 382

CHAPTER 13
Quality Control and Acceptance Sampling 386

13.1 *Control Charts* 387
13.2 *Acceptance Sampling by Attributes—Single Sampling Plans* 405
13.3 *Other Acceptance Sampling Plans* 416
Problems 421

CHAPTER 14
Linear Models for Data 424

14.1 *Least Squares and Linear Regression* 425
14.2 *Confidence Intervals for the Parameters* 436
14.3 *Hypothesis Testing on the Parameters* 441
14.4 *Multiple Linear Regression* 445
14.5 *Correlation Analysis* 448
Problems 452

CHAPTER 15
Information Theory and Coding 457
15.1 *Uncertainty, Information, and Entropy* 458
15.2 *Discrete Sources and the First Coding Theorem* 467
15.3 *Discrete Channels and the Second Coding Theorem* 478
Problems 491

APPENDIX A
Review of Set Theory 497

APPENDIX B
Cumulative Distribution Function of the Binomial Distribution 500

APPENDIX C
Cumulative Distribution Function of the Poisson Distribution 505

APPENDIX D
Tabulation of the Standard Normal Distribution 509

APPENDIX E
Percentage Points of the Chi-Square Distribution 512

APPENDIX F
Percentage Points of the t-Distribution 514
