

Contents

1. Experiments, Sets, and Sample Spaces

1.1. Introduction	1
1.2. Deterministic and Nondeterministic Experiments	2
1.3. Sets and Sample Spaces	3
1.4. Sets	5
1.4.1. Definitions and Basic Properties	5
1.4.2. Operations on Sets	8
1.4.3. Further Properties of Set Operations	12
1.5. Cartesian Products	18
1.6. Functions	23
1.7. Sequences and Series	28
1.7.1. Sequences	28
1.7.2. Limits	31
1.7.3. Infinite Series	35
<i>Exercises</i>	39

2. Probability Spaces

2.1. Introduction	45
2.2. Relative Frequencies and Finite Probability Spaces	46
2.3. Properties of Finite Probability Spaces	56
2.3.1. Probability of Events	56
2.3.2. Calculation Theorems	63
2.4. Denumerable Probability Spaces	75
2.5. Nondiscrete Probability Spaces and the Kolmogorov Axioms	81
<i>Exercises</i>	86

3. Counting and Uniform Probability Spaces

3.1. Introduction	93
3.2. Basic Counting Methods	94
3.2.1. Tree Diagrams	94

3.2.2. The Fundamental Principle of Counting	97
3.3. Permutations and Combinations	105
3.3.1 Permutations	106
3.3.2. Combinations	115
3.4. Binomial Coefficients	121
3.5. Further Applications of Combinatorial Probability	126
3.5.1. Keno	126
3.5.2. Poker	129
3.5.3. The Poker Test: Is π Random?	132
3.5.4. The Match Problem	137
3.5.5. Multinomial Coefficients	140
<i>Exercises</i>	143
4. Conditional Probability	
4.1. Introduction	149
4.2. Conditional Probability	149
4.3. The Product Rule	154
4.4. Total Probability and Conditioning	159
4.5. Bayes's Rule	163
<i>Exercises</i>	166
5. Independence	
5.1. Introduction	169
5.2. Independent Events	169
5.3. Discrete Product Spaces	174
5.4. Bernoulli Trials	180
5.5. Introduction to Reliability Theory	185
5.6. Infinite Bernoulli Trials	191
<i>Exercises</i>	196
6. Discrete Random Variables	
6.1. Introduction	201
6.2. Random Variables and Their Distributions	202
6.3. Some Commonly Occurring Distributions	213
6.3.1. Degenerate Distribution	213
6.3.2. Bernoulli Distribution	213
6.3.3. The Uniform Distribution	214
6.3.4. Binomial Distribution	214
6.3.5. Poisson Distribution	217
6.3.6. Geometric Distribution	224
6.3.7. Negative Binomial Distribution	226
6.3.8. Hypergeometric Distribution	229
6.3.9. Empirical Distributions and Zipf's Law	230
6.4. Computations Using the Distribution	233
<i>Exercises</i>	238

7. Joint Distributions and Independent Random Variables

7.1. Introduction 245
 7.2. Joint Distribution 245
 7.3. Independent Random Variables 262
 7.4. Functions of Random Variables 269
 7.4.1. Definition and Examples 269
 7.4.2. Sums of Random Variables 275
 7.4.3. Probability Generating Functions 277
 7.4.4. Some Order Statistics 283
Exercises 285

8. Expectation

8.1. Introduction 291
 8.2. Definition and Properties of Expectation 292
 8.3. Expectation on Denumerable Sample Spaces 301
 8.4. Expectation of Functions of Random Variables 306
 8.5. Variance and Covariance 322
 8.6. Chebyshev's Inequality and the Law of Large Numbers 337
 8.7. Conditional Expectation 343
Exercises 346

9. Densities and The Central Limit Theorem

9.1. Introduction 353
 9.2. Probability Spaces on the Real Line 354
 9.3. Expectation 360
 9.4. Normal Random Variables 365
 9.5. The Central Limit Theorem 374
Exercises 381

10. Distribution of Nondiscrete Random Variables

10.1. Introduction 385
 10.2. Cumulative Distribution Function 385
 10.3. Some Commonly Occurring Densities 395
 10.3.1. Gamma Function 396
 10.3.2. Beta Function 397
 10.3.3. Gamma Densities 399
 10.3.4. Lognormal Densities 404
 10.3.5. Weibull Densities 406
 10.3.6. Beta Densities 409
 10.3.7. T and F Densities 410
 10.4. Functions of a Random Variable 411
Exercises 417

11. Joint Distribution of Nondiscrete Random Variables

11.1. Introduction	423
11.2. Joint Densities	423
11.3. Independent Random Variables	437
11.4. Functions of Independent Random Variables	440
11.4.1. Distribution of Sums	440
11.4.2. Distribution of Ratios	445
11.4.3. Method of Jacobians	451
11.4.4. Some Normal Distribution Theory	456
11.5. Order Statistics	461
11.5.1. Distribution Theory	461
11.5.2. Reliability Theory	471
11.5.3. Spare Parts and the Renewal Equation	478
11.6. Generating Functions	484
11.6.1. Moment Generating Functions	485
11.6.2. Characteristic Functions	489
11.6.3. Weak Law of Large Numbers	495
11.6.4. Central Limit Theorem	497
11.7. Joint Generating Functions	501
11.7.1. Joint Probability Generating Functions	501
11.7.2. Joint Moment Generating Functions	502
11.7.3. The Joint Characteristic Function	505
11.8. Multivariate Central Limit Theorem	506
11.8.1. Multivariate Normal Densities	507
11.8.2. Proof of the Multivariate Central Limit Theorem	514
11.9. Conditional Densities	520
11.9.1. Introduction	520
11.9.2. Conditional Expectation	524
<i>Exercises</i>	526

12. Statistics

12.1. Introduction	537
12.2. Parameter Estimation	538
12.2.1. Estimation for Discrete Random Variables	539
12.2.2. Estimation for Absolutely Continuous Random Variables	548
12.3. Properties of Estimators	559
12.3.1. Consistency and Unbiasedness	559
12.3.2. Sufficiency	563
12.4. Confidence Intervals	568
12.4.1. Exact Confidence Intervals	568
12.4.2. Approximate Confidence Intervals	573
12.5. Hypothesis Testing	575
12.5.1. Best Tests	577
12.5.2. Generalized Likelihood Ratio Tests	583

12.6. χ^2 Tests 587
12.6.1. Goodness of Fit 587
12.6.2. χ^2 Tests for Independence 592
12.7. Hypothesis Testing and Confidence Intervals 594
12.8. Linear Regression 595
12.8.1. The Normal Equations 596
12.8.2. Properties of $\hat{\beta}$ 603
12.8.3. Testing: σ^2 Unknown 606
<i>Exercises</i> 612
Solutions to Selected Exercises 623
Appendix 647
