

# Contents

*Editors' Foreword, v*

*Preface, vii*

## **1. Foundations**

**1**

1. PROBABILITY SPACES, 1
2. RANDOM VARIABLES AND EXPECTATIONS, 4
3. INDEPENDENCE, 7
4. THE CONSTRUCTION OF RANDOM VARIABLES, 13

## **2. Laws of Large Numbers and Series**

**19**

5. THE WEAK LAW OF LARGE NUMBERS, 19
6. THE WEIERSTRASS APPROXIMATION THEOREM, 24
7. THE STRONG LAW OF LARGE NUMBERS, 25
8. THE STRONG LAW—CONTINUED, 28
9. CONVERGENCE OF SERIES, 34
10. MORE ON INDEPENDENCE; THE 0-1 LAW, 34
11. THE LAW OF THE ITERATED LOGARITHM, 41

- 3. Limiting Distributions and the "Central Limit Problem" 50**
- 12. WEAK CONVERGENCE OF MEASURES, 50
  - 13. THE MAXIMUM OF A SAMPLE, 56
  - 14. CHARACTERISTIC FUNCTIONS, 58
  - 15. CENTRAL LIMIT THEOREMS, 66
  - 16. SYMMETRIC STABLE LAWS, 73
  - 17. STABLE LAWS AND LIMIT THEOREMS, 79
  - 18. INFINITELY DIVISIBLE LAWS, 86
  - 19. RECURRENCE, 92
- 4. Stochastic Processes 98**
- 20. BROWNIAN MOTION—INTRODUCTION, 98
  - 21. THE FIRST CONSTRUCTION, 102
  - 22. SOME PROPERTIES OF BROWNIAN PATHS, 108
  - 23. MARKOV TRANSITION FUNCTIONS, 114
  - 24. CONTINUITY OF PATHS, 119
  - 25. KOLMOGOROV'S EQUATIONS, 124
  - 26. BROWNIAN MOTION AND LIMIT THEOREMS, 129
  - 27. BROWNIAN MOTION AND BOUNDARY VALUE PROBLEMS, 136
  - 28. BROWNIAN MOTION AND EIGENVALUE PROBLEMS, 139

*Bibliography, 144*

*Index, 148*
