

Contents

1 *Introduction* 1

1. History	1
2. Probability Models	4
3. The Empirical Basis of Probability Theory	5
<i>Notes and References</i>	9
<i>Glossary and Summary</i>	9
<i>Exercises</i>	10

2 *The Elements of Probability Theory* 16

1. Preliminaries	16
2. A Brief Outline of Set Theory	17
3. Formal Structure: Probabilities	28
4. Probability Calculations Using Venn Diagrams	29
5. Formal Proofs	38
6. Fitting a Probability Model	41
<i>Notes and References</i>	43
<i>Glossary and Summary</i>	44
<i>Exercises</i>	46
<i>Theoretical Exercises</i>	51

3 Finite Probability Models and Random Sampling 54

1. Finite Probability Models	54
2. Simple Random Sampling	58
3. Combinatorial Analysis	67
<i>Notes and References</i>	76
<i>Glossary and Summary</i>	76
<i>Exercises</i>	78
<i>Theoretical Exercises</i>	83

4 Conditional Probability and Probabilistic Independence 85

1. Conditional Probability	85
2. Probabilistic Independence	106
3. Composite Random Experiments	118
<i>Notes and References</i>	124
<i>Glossary and Summary</i>	126
<i>Exercises</i>	129
<i>Theoretical Exercises</i>	142

5 Random Variables 144

1. Introduction	144
2. Discrete and Continuous Random Variables	147
3. Probability Mass Functions of Discrete Random Variables	148
4. Probability Density Functions	155
5. Cumulative Distribution Functions	163
6. Transformations of a Random Variable	181
<i>Notes and References</i>	198
<i>Glossary and Summary</i>	202
<i>Exercises</i>	205
<i>Theoretical Exercises</i>	213

6 Descriptive Properties of Distributions 215

1. Introduction	215
2. Measures of Location for a Distribution: The Mean	217
3. Other Measures of Location for a Distribution: Median, Quantile, Mode	225

4. The Expected Value of a Function of a Random Variable	233
5. Measures of Dispersion for a Distribution: The Variance and the Standard Deviation	237
6. Higher Moments	246
7. Some Probability Inequalities	248
<i>Notes: Estimation of the Mean and Variance</i>	252
<i>Glossary and Summary</i>	255
<i>Exercises</i>	261
<i>Theoretical Exercises</i>	268

7 Sums and Averages of Independent Random Variables 272

1. Mutually Independent Random Variables	273
2. Sums of Independent Random Variables	277
3. The Moment Generating Function	284
<i>Notes and References</i>	292
<i>Glossary and Summary</i>	294
<i>Exercises</i>	297
<i>Theoretical Exercises</i>	303

8 Special Distributions: Discrete Case 304

1. Bernoulli Trials and the Binomial Distribution	304
2. The Hypergeometric Distribution	316
3. The Poisson Distribution	326
4. The Geometric Distribution	334
5. Negative Binomial Distribution	341
6. Other Discrete Distributions	349
<i>Glossary and Summary</i>	357
<i>Exercises</i>	359
<i>Theoretical Exercises</i>	371

9 The Normal Distribution 375

1. Introduction	375
2. The Normal Density and Its Properties	377
3. Probability Calculations: The Standard Normal Distribution	379
4. Fitting a Normal Distribution	386
5. The Central Limit Theorem	390

6. The Moment Generating Function and a Proof of the Central Limit Theorem	408
<i>Glossary and Summary</i>	412
<i>Exercises</i>	415
<i>Theoretical Exercises</i>	420

10 Special Distributions: Continuous Case 422

1. The Exponential Distribution	422
2. The Gamma Distribution	430
3. The Weibull Distribution	444
4. The Uniform Distribution	453
5. The Beta Distribution	456
6. The Lognormal and Cauchy Distributions	466
<i>Glossary and Summary</i>	474
<i>Exercises</i>	477
<i>Theoretical Exercises</i>	485

11 Bivariate Distributions 487

1. Introduction	487
2. Determining Bivariate Distributions	488
3. Descriptive Indices of Bivariate Distributions	500
4. Joint Moment Generating Function	512
5. Conditional Distributions	516
<i>Notes and References: Multivariate Distributions</i>	534
<i>Glossary and Summary</i>	539
<i>Exercises</i>	544
<i>Theoretical Exercises</i>	549

12 The Bivariate Normal Distribution 554

1. The Bivariate Normal Density	554
2. Conditional Distributions	559
3. Joint Moment Generating Function	561
4. Probability Calculations	566
<i>Glossary and Summary</i>	573
<i>Exercises</i>	575
<i>Theoretical Exercises</i>	577

13 Transformations of Two Random Variables 580

- | | |
|---|-----|
| 1. One-to-One Bivariate Transformations | 581 |
| 2. Many-to-One Transformations | 586 |
| 3. Sums and Weighted Sums of Random Variables | 590 |
| 4. Distributions of Sums (and Weighted Sums) in Special Cases | 599 |
| <i>Glossary and Summary</i> | 602 |
| <i>Exercises</i> | 605 |

14 Fitting and Testing Goodness of Fit of Probability Models 610

- | | |
|---|-----|
| 1. The Chi-Squared Goodness-of-Fit Test | 612 |
| 2. Testing Goodness of Fit of Parametric Models | 617 |
| 3. Statistical Tests of Hypotheses | 623 |
| 4. Estimation in Parametric Families | 632 |
| <i>Notes and References</i> | 641 |
| <i>Glossary and Summary</i> | 643 |
| <i>Exercises</i> | 646 |
| <i>Theoretical Exercises</i> | 653 |

Appendix A 657

- | | |
|--------------------|-----|
| The Gamma Function | 657 |
|--------------------|-----|

Appendix B 666

- | | |
|--------|-----|
| Tables | 666 |
|--------|-----|
