

# Contents

<b>Preface</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 Counting</b>	<b>17</b>
2.1 order counts, with replacement . . . . .	20
2.2 order counts, without replacement . . . . .	20
2.3 order does not count, without replacement . . . . .	23
2.4 order does not count, with replacement . . . . .	25
<b>3 Independence and Conditional Probability</b>	<b>41</b>
3.1 Independence . . . . .	41
3.2 Bernoulli Trials . . . . .	47
3.3 The Most Likely Number of Successes . . . . .	52
3.4 Conditional Probability . . . . .	55
<b>4 Random Variables</b>	<b>75</b>
4.1 Expected Value and Variance . . . . .	76
4.2 Computation of Expected Value and Variance . . . . .	90

<b>5</b>	<b>More About Random Variables</b>	<b>111</b>
5.1	The Law of Large Numbers . . . . .	111
5.2	Conditional Probability . . . . .	122
5.3	Computation of Variance . . . . .	127
<b>6</b>	<b>Approximating Probabilities</b>	<b>135</b>
6.1	The Poisson Distribution . . . . .	136
6.2	Stirling's Formula . . . . .	143
6.3	The Normal Distribution . . . . .	147
<b>7</b>	<b>Generating Functions</b>	<b>165</b>
<b>8</b>	<b>Random Walks</b>	<b>183</b>
8.1	The Probability Peter Wins . . . . .	183
8.2	The Duration of Play . . . . .	199
<b>9</b>	<b>Markov Chains</b>	<b>209</b>
9.1	What Is a Markov Chain? . . . . .	209
9.2	Where Do We Get and How Often? . . . . .	219
9.3	How Long Does It Take? . . . . .	225
9.4	What Happens in the Long Run? . . . . .	236
	<b>Table of Important Distributions</b>	<b>251</b>
	<b>Answers</b>	<b>253</b>
	<b>Index</b>	<b>263</b>
