

CONTENTS

I. The Guarded Guide	1
II. A Graduated Guide	10
III. The Measurement of Probabilities	23
IV. Propositional Functions and Conditional Probabilities	46
V. Bernoulli's Theorem	73
VI. Singular Propositions	101
VII. Equiprobability and Randomness	109
VIII. Inverse Arguments	126
IX. Talking with Statisticians	163
X. Continuity and Density	174
XI. Biological Probabilities and Imperfect Information	187
XII. Objective Probability and Physics	192
Appendix I	209
Appendix II	213
Index	217
