

CONTENTS

CHAPTER 1. <i>Historical background and practical motivation of the problem</i>	
1.1. Why study probabilities on general structures	13
1.2. Some classical methods and results	14
1.3. Practical background to the theory	20
1.4. Historical background.	26
CHAPTER 2. <i>Stochastic semi-groups</i>	
2.1. Generalities	34
2.2. Stochastic semi-groups	36
2.3. Compact stochastic semi-groups	39
2.4. Illustrations	49
CHAPTER 3. <i>Stochastic groups; compact and commutative cases</i>	
3.1. Generalities on stochastic groups	55
3.2. Compact stochastic groups	62
3.3. Commutative locally compact stochastic groups	72
3.4. Illustrations	79
CHAPTER 4. <i>Stochastic Lie groups</i>	
4.1. Preliminaries on Lie groups	81
4.2. Homogeneous processes on Lie groups	82
4.3. The law of large numbers for stochastic Lie groups	89
4.4. A central limit theorem	91
4.5. Illustrations	96
CHAPTER 5. <i>Locally compact stochastic groups</i>	
5.1. Unitary representations	101
5.2. Fourier analysis of locally compact stochastic groups	104
5.3. Limit theorems on locally compact stochastic groups	110
5.4. Limit theorems on certain divisible groups	114
5.5. Illustrations	118

CHAPTER 6. Stochastic linear spaces

6.1. Probabilities on a Banach space	127
6.2. Fourier analysis in a stochastic Banach space	130
6.3. Normal distributions in a Hilbert space	140
6.4. The law of large numbers	143
6.5. The central limit theorem	145
6.6. Stochastic Schwartz distributions	146
6.7. Illustrations	148

CHAPTER 7. Stochastic algebras

7.1. Additive and multiplicative limit theorems.	152
7.2. Probabilities on a Banach algebra	160
7.3. Stochastic operators and random equations	163
7.4. More special structures	166
7.5. Illustrations	168
