CONTENTS

J.C. Alt
Une forme générale de la loi forte des grands nombres pour des variables aleatoires vectorielles 1

A. Bartoszewicz
On some sufficient conditions for the existence of a consistent test in noncommutative statistics 16

T. Byczkowski and P. Graczyk
Levy – Kchinchine formula on vector spaces 23

S.A. Chobanyan and G.J. Georgobiani
A problem of rearrangements of summands in normed spaces and Rademacher sums 33

S. Csorgo
An extreme-sum approximation to infinitely divisible laws without a normal component ...47

P. Feinsilver and R. Schott
An operator approach to processes on Lie groups 59

X. Fernique
Régularité de fonctions aleatoires Gaussiennes stationnaires a valeurs vectorielles 66

E. Giné and J. Zinn
L_p multipliers in the central limit theorem with p-stable limit 74

M.G. Hahn , J. Kuelbs and D.C. Weiner
A universal law of the iterated logarithm for trimmed and censored sums 82

W. Hazod
On the decomposability group of a convolution semigroup 99

E. Hensz
Strong laws of large numbers for orthogonal sequences in von Neumann algebras 112

R. Jajte
Strong laws of large numbers for several contractions in a von Neumann algebra 125

Z. Jurek
Linear supports and absolute continuity of certain random integrals 140

R. LePage
Conditional moments for coordinates of stable vectors 148

M. Lewandowski and W. Linde
Real translates of complex measures 164

A. Luczak
Banach space-valued Gleason measures on von Neumann algebras 178

A. Madrecki
On the p-Levy-Baxter property and its applications 191

A. Makagon and H. Salehi
Notes on infinite dimensional stationary sequences 200

M. Marques and S. Cambanis
Admissible and singular translates of stable processes 239

P. Masani and H. Niemi
An outline of the integration theory of Banach space valued measures 258

J. Misiewicz and C. Ryll-Nardzewski
Norm dependent positive definite functions and measures on vector spaces 284

Nguyen Duy Tien and Nguyen Van Hung
On the convergence of weighted sums of martingale differences 293

G. Pap
Density of the norm of translated stable vectors in Banach spaces 308

K. Podgorski
Martingale approach to Boltzmann's entropy and exact transformations 321

A.J. Rackauskas
On the martingale central limit theorem in Banach spaces 329

A. Russek
On series expansions of stochastic integrals 337

M. Rybaczuk and K. Weron
Master equation for quantum oscillator with infinitely divisible noise 353

K. Samotij
On the convergence of the series $\Sigma K_n(U^n-U^{-n})$ 359

W. Smolenski and R. Sztencel
On admissible translates of subgaussian stable measures 365

Z. Suchanecki
An L^1 extention of stochastic dynamics for irreversible systems 367

V.I. Tarieladze
Vector valued Fourier series and sample continuity of random processes 375

J. Wos
Singular integrals and second-order stationary sequences 388

T. Zak
On the difference of Gaussian measure of two balls in Hilbert spaces 401

A.M. Zapala
Brownian sheets in a locally pseudoconvex metric linear space 406
