## **Chapter I**

### **SPACES, MAPPINGS, AND MEASURES**

1. Classes of Sets	1
2. Alexandrov Spaces, Topological Spaces, and Measurable Spaces	4
3. Mappings	6
4. Classes of Bounded, Real-Valued, Continuous Functions and Measurable Functions	11
5. Normal Spaces and Completely Normal Spaces	15
6. Sequences of Sets	17
7. Metric Spaces	20
8. Mappings into Metric Spaces	23
9. Product Spaces	25
10. Product Spaces of Infinitely Many Factors	28
11. Some Particular Metric Spaces	30
12. Measures on an Algebra of Subsets	33
13. Measures on A-Spaces	35
14. Extensions of Measures	38
15. Measures on Infinite-Dimensional Product Spaces	41
16. Completion of Measures, Continuity Almost Surely and Almost Everywhere	44

## **Chapter II**

### **INTEGRALS, BOUNDED, LINEAR FUNCTIONALS, AND MEASURES**

1. Integrals as Nonnegative, Bounded, Linear Functionals	47
2. Generalizations of the Abstract Integral	50
3. The Representations of Bounded, Linear Functionals by Integrals	52
4. Measures Belonging to a Nonnegative, Bounded, Linear Functional on a Normal A-Space	54

5. Transformations of Measures and Integrals	57
6. Constructions of Measures on Metric Spaces by Riemann–Stieltjes Integrals	59
7. Measures on Product Spaces	61
8. Convolutions of Measures	64
9. Probability Spaces and Random Variables	66
10. Expectations, Conditional Expectations, and Conditional Probabilities	68
11. The Jensen Inequality	73

### Chapter III

#### WEAK CONVERGENCE IN NORMAL SPACES

1. Weak Convergence of Sequences of Measures on Normal Spaces	77
2. Weak Convergence of Sequences of Induced Measures and Transformed Measures	81
3. Uniformly $\sigma$ -Smooth Sequences of Measures	82
4. Weak Limits of $\sigma$ -Smooth Measures on Completely Normal A-Spaces	85
5. Reduction of Weak Limit Problems by Transformations	88
6. The Reduction Procedure for Metric Spaces	90
7. Weak Convergence of Tight Sequences of Measures on Metric Spaces	93
8. Seminorms on an Algebra	95
9. Some Fundamental Identities and Inequalities for Products	96
10. Convergence in Seminorms of Powers to Infinitely Divisible Elements	99
11. Convergence in Seminorms of Products	101

### Chapter IV

#### WEAK CONVERGENCE ON $R^{(k)}$

1. $\sigma$ -Smooth Measures on $R^{(k)}$	103
2. Gaussian Measures and Gaussian Transforms	104
3. Fourier Transforms and Their Relation to Gaussian Transforms	108
4. Gaussian Seminorms	112
5. The Semigroup of $\sigma$ -Smooth Measures	118
6. Stability Conditions for Convolution Products That Converge Weakly	121
7. The Unique Divisibility of Infinitely Divisible $\sigma$ -Smooth Measures	125
8. Lévy Measures on $R^{(k)}$ ; Gaussian Functionals	126
9. Weak Convergence of Convolution Powers of $\sigma$ -Smooth Measures	130
10. The Semigroup of Infinitely Divisible $\sigma$ -Smooth Measures	134
11. The Characteristic Function of an Infinitely Divisible Probability Measure on $R^{(k)}$ and Its Connection with the Gaussian Functional	139
12. Weak Convergence of Convolution Products	142
13. Stable Probability Measures	144
14. Gaussian Transforms and Gaussian Seminorms of Random Variables: A Comparison Method	151
15. Weak Limits of Distributions of Sums of Martingale Differences	155
16. Weak Limits of Distributions of Sums of Random Variables under Independence and $\varphi$ -Mixing	159

**Chapter V****WEAK CONVERGENCE ON THE  $C$ - AND  $D$ -SPACES**

1. The $C$ - and $D$ -spaces	167
2. Projections	170
3. Approximations of Functions by Schauder Sequences	172
4. Weak Convergence	177
5. Fluctuations and Weak Convergence	180
6. Construction of Probability Measures on the $C$ - and $D$ -Spaces	185
7. Gaussian $\sigma$ -Smooth Measures on the $C$ - and $D$ -Spaces	188
8. Embedding of Sums of Real-Valued Random Variables in Random Functions into the $D$ -Space	191
9. Empirical Distribution Functions	197
10. Embedding of Sequences of Martingale Differences in Random Functions	201

**Chapter VI****WEAK CONVERGENCE IN SEPARABLE HILBERT SPACES**

1. $\sigma$ -Smooth Measures on $l^2$ -Space	205
2. Weak Convergence of Convolution Products of Probability Measures on $l^2$	208
3. Necessary and Sufficient Conditions for the Weak Convergence of Convolution Products of Symmetrical Probability Measures	212
4. Necessary and Sufficient Conditions for the Weak Convergence of Convolution Powers of Probability Measures	214
5. Different Forms of Necessary and Sufficient Conditions for the Weak Convergence of Convolution Powers of Probability Measures on $l^2$	219
6. Invariants of Infinitely Divisible $\sigma$ -Smooth Measures on $l^2$ . Gaussian Functionals	228
7. The Characteristic Function of Probability Measures on $l^2$	233

**Appendix**

<b>A PRODUCT-SUM IDENTITY</b>	235
-------------------------------	-----

<b>NOTES AND COMMENTS</b>	238
