# Contents

**Preface** ..... IX

**Chapter I**
**Events, Observables and States** ..... 1

1 From classical to quantum probability ..... 1
2 Notational preliminaries ..... 2
3 Finite dimensional quantum probability spaces ..... 6
4 Observables in a simple quantum probability space ..... 9
5 Variance and covariance ..... 13
6 Dynamics in finite dimensional quantum probability spaces ..... 18
7 Observables with infinite number of values and the Hahn-Hellinger Theorem ..... 22
8 Probability distributions on $\mathcal{P}(\mathcal{H})$ and Gleason's Theorem ..... 31
9 Trace class operators and Schatten's Theorem ..... 43
10 Spectral integration and Stone's Theorem on the unitary representations of $\mathbb{R}^k$ ..... 53
11 Basic notions of the theory of unbounded operators ..... 60
12 Spectral integration of unbounded functions and von Neumann's Spectral Theorem ..... 65
13 Stone generators, characteristic functions and moments ..... 73
14 Wigner's Theorem on the automorphisms of $\mathcal{P}(\mathcal{H})$ ..... 82

**Chapter II**
**Observables and States in Tensor Products of Hilbert Spaces** ..... 91

15 Positive definite kernels and tensor products of Hilbert Spaces ..... 91
16 Operators in tensor products of Hilbert Spaces ..... 97
17 Symmetric and antisymmetric tensor products ..... 105
18 Examples of discrete time quantum stochastic flows ..... 111
19 The Fock Spaces ..... 123
20 The Weyl Representation ..... 134
21 Weyl Representation and infinitely divisible distributions ..... 152
22 The symplectic group of $\mathcal{H}$ and Shale's Theorem ..... 162
23 Creation, conservation and annihilation operators in $\Gamma_a(\mathcal{H})$ ..... 172

**Chapter III**
**Stochastic Integration and Quantum Ito's Formula** ..... 179

24 Adapted processes ..... 179

25 Stochastic integration with respect to creation, conservation and annihilation processes ..... 183

26 A class of quantum stochastic differential equations ..... 207

27 Stochastic differential equations with infinite degrees of freedom ..... 221

28 Evans-Hudson Flows ..... 233

29 A digression on completely positive linear maps and Stinespring's Theorem ..... 250

30 Generators of quantum dynamical semigroups and the Gorini, Kossakowski, Sudarshan, Lindblad Theorem ..... 257

**References** ..... 275

**Index** ..... 283

**Author Index** ..... 289
