Preface	v
Introduction	vii

CHAPTER I. DEVELOPMENT AND GENERAL THEORY OF STIMULUS SAMPLING

Introduction	1
Toward a statistical theory of learning <i>W. K. Estes</i>	12
A theory of stimulus variability in learning <i>W. K. Estes and C. J. Burke</i>	25
Probability of response to compounds of discriminated stimuli <i>M. S. Schoeffler</i>	36
Component and pattern models with Markovian interpretations <i>W. K. Estes</i>	43
Statistical theory of spontaneous recovery and regression <i>W. K. Estes</i>	87
Spontaneous recovery and statistical learning theory <i>L. E. Homme</i>	97
Growth and function of mathematical models for learning <i>W. K. Estes</i>	105
Statistical theory of distributional phenomena in learning <i>W. K. Estes</i>	120
Nonrandom stimulus sampling in statistical learning theory <i>W. Prokasy</i>	129
A model with neutral elements <i>D. LaBerge</i>	135

CHAPTER II. ELEMENTS OF ASSOCIATIVE LEARNING

Introduction	
All-or-none processes in learning and retention <i>W. K. Estes</i>	149
All-or-none and conservation effects in the learning and retention of paired associates <i>W. K. Estes, B. L. Hopkins, and E. J. Crothers</i>	167

Application of a model to paired-associate learning <i>G. H. Bower</i>	178
A fundamental property of all-or-none models, binomial distribution of responses prior to conditioning with application to concept formation in young children <i>P. Suppes and R. Ginsberg</i>	204
Experimental studies of mathematical concept formation in young children <i>P. Suppes and R. Ginsberg</i>	216
All-or-none learning and the role of repetition in paired-associate learning <i>W. Kintsch</i>	227
Association and discrimination in paired-associate learning <i>M. C. Polson, F. Restle, and P. G. Polson</i>	231
Simple conditioning as two-stage all-or-none learning <i>J. Theios</i>	240
CHAPTER III. PROBABILITY LEARNING	
Introduction	255
Analysis of a verbal conditioning situation in terms of statistical learning theory <i>W. K. Estes and J. H. Straughan</i>	274
Theory of learning with constant, variable, or contingent probabilities of reinforcement <i>W. K. Estes</i>	284
Two-choice behavior under extended training with shifting probabilities of reinforcement <i>M. P. Friedman, C. J. Burke, M. Cole, L. Keller, R. B. Millward, and W. K. Estes</i>	304
Effects of type of non-reinforcement and number of available responses in two verbal conditioning situations <i>E. D. Neimark</i>	339
An analysis of the effect of non-reinforced trials in terms of statistical learning theory <i>R. C. Atkinson</i>	351
Test of stimulus sampling theory for a continuum of responses with unimodal noncontingent determinate reinforcement <i>P. Suppes and R. W. Frankmann</i>	356
Theoretical treatments of differential reward in multiple-choice learning and two-person interactions <i>W. K. Estes</i>	367

The learning of choices between bets <i>M. P. Friedman, G. Padilla, and H. Gelfand</i>	384
Choice behavior and reward structure <i>J. L. Myers and R. C. Atkinson</i>	395
CHAPTER IV. SINGLE PROCESS MODELS FOR GENERALIZATION AND DISCRIMINATION	
Introduction	430
A model for stimulus generalization and discrimination <i>R. R. Bush and F. Mosteller</i>	438
Interpretation of stimulus generalization <i>R. C. Atkinson and W. K. Estes</i>	449
An application of stimulus sampling theory to summated generalization <i>T. S. Carterette</i>	456
A component model for stimulus variables in discrimination learning <i>C. J. Burke and W. K. Estes</i>	464
Probabilistic discrimination learning <i>W. K. Estes, C. J. Burke, R. C. Atkinson, and J. P. Frankmann</i>	477
The selection of strategies in cue learning <i>F. Restle</i>	484
Concept identification <i>G. Bower and T. Trabasso</i>	499
Observable changes of hypotheses under positive reinforcement <i>P. Suppes and M. Schlag-Rey</i>	523
A mixed model <i>R. C. Atkinson and W. K. Estes</i>	529
Acquisition and transfer in pattern vs. component discrimination learning <i>W. K. Estes and B. L. Hopkins</i>	536
Transfer effects in discrimination learning <i>M. P. Friedman and H. Gelfand</i>	543
CHAPTER V. MULTIPROCESS MODELS FOR DISCRIMINATION AND CHOICE	
Introduction	554
A theory of discrimination learning <i>F. Restle</i>	561

A Markov model for discrimination learning <i>R. C. Atkinson</i>	570
The observing response in discrimination learning <i>R. C. Atkinson</i>	584
Discrimination learning in a verbal conditioning situation <i>J. Popper and R. C. Atkinson</i>	594
Supplementary report: Discrimination learning with probabilistic reinforcement schedules <i>R. C. Atkinson, W. H. Bogartz, and R. N. Turner</i>	599
Sequential phenomena in psychophysical judgments: A theoretical analysis <i>R. C. Atkinson, E. C. Carterette, and R. A. Kinchla</i>	601
A detection method and probabilistic models for assessing information processing from brief visual displays <i>W. K. Estes and H. A. Taylor</i>	616
Choice-point behavior <i>G. H. Bower</i>	625
A random-walk model for choice behavior <i>W. K. Estes</i>	641
A response time model for choice behavior <i>W. Kintsch</i>	654
A recruitment theory of simple behavior <i>D. LaBerge</i>	660
