

Contents

Part 1. THE INVARIANCE PRINCIPLE. CONVERGENCE-RATE ESTIMATES AND LARGE DEVIATIONS1

A.I. Sakhanenko

Convergence Rate in the Invariance Principle for
Non-identically Distributed Variables with Exponential
Moments2

S.S. Utev

Inequalities for Sums of Weakly Dependent Random Variables
and Estimates of the Convergence Rate in the Invariance
Principle73

V.R. Khodzhibaev

Asymptotic Analysis of Distributions in Two-boundary
Problems for Continuous-time Random Walks114

A.A. Mogul'skij

Probabilities of Large Deviations for Trajectories of
Random Walks140

Part 2. LIMIT THEOREMS FOR RANDOM PROCESSES OF PARTICULAR TYPES185

I.S. Borisov

On the Convergence Rate in the Central Limit Theorem186

V.S. Lugavov

On the Distribution of the Sojourn Time on a Half-axis
and the Final Position of a Process with Independent
Increments Controlled by a Markov Chain214

<i>A.L. Miroshnikov</i>	
Inequalities for the Integral Concentration Function	236
<i>A.V. Pozhidaev</i>	
Asymptotic Normality of Solutions of Parabolic Equations with Random Coefficients	253
<i>V.A. Topchij</i>	
Asymptotics of the Probability of Continued Critical General Branching Processes with No Second Moment for the Number of Decendants	269
List of forthcoming publications	297
Transliteration table	299
