

Contents

Chapter I: Some Examples	1
1.1: The General Idea	1
1.2: The Classical CRAMÈR Theorem	3
1.3: SCHILDER's Theorem	8
1.4: Two Applications of SCHILDER's Theorem	21
Chapter II: Some Generalities	35
2.1: The Large Deviation Principle	35
2.2: Large Deviations and Convex Analysis	52
Chapter III: Generalized Cramèr Theory	58
3.1: Preliminary Formulation	58
3.2: SANOV's Theorem	64
3.3: CRAMÈR's Theorem for BANACH Spaces	78
3.4: Large Deviations for GAUSSIAN Measures	85
Chapter IV: Uniform Large Deviations	91
4.1: MARKOV Chains	91
4.2: Continuous Time MARKOV Processes	110
4.3: The WIENER Sausage	140
4.4: Process Level Large Deviations	161
Chapter V: Non-Uniform Results	185
5.1: Generalities about the Upper Bound	185
5.2: A Little Ergodic Theory	193
5.3: The General Symmetric MARKOV Case	206
5.4: The Large Deviation Principle for Hypermixing Processes	213
5.5: Hypermixing in the Epsilon MARKOV Case	231

Chapter VI: Analytic Considerations	237
6.1: When is a MARKOV Process Hypermixing?	237
6.2: Symmetric Diffusions on a Manifold	250
6.3: Hypoelliptic Diffusions on a Compact Manifold	271
Historical Notes and References	284
Notation Index	301
Subject Index	305
