Preface	ix
1 Preliminary notions	1
1.1 Introduction	1
1.2 Sums of independent random variables: standardization	2
1.3 Moments, cumulants and their generating functions	5
1.4 Properties of sums of independent random variables	9
1.5 Calculation of moments and cumulants	11
1.6 Appendix: Orthogonal polynomials	16
Further results and exercises	19
Bibliographic notes	23
2 Some basic limiting procedures	25
2.1 Introduction	25
2.2 A simple example	25
2.3 Some convergence concepts	28
2.4 Convergence after functional transformation	32
2.5 Approximate linearization	33
2.6 Direct calculations with density functions and moment generating functions	38
2.7 Multidimensional version	40
2.8 Convergence of moments	43
2.9 Appendix: Some basic limit theorems	45
Further results and exercises	48
Bibliographic notes	52
3 Asymptotic expansions	54
3.1 Introduction	54

3.2	Integration by parts	55
3.3	Laplace expansion	58
3.4	Summation of series	68
3.5	Inversion of series	71
3.6	Asymptotic expansions of distributions by direct methods	73
3.7	Asymptotic expansions of distributions via generating functions	75
3.8	Asymptotic expansions for random variables	77
3.9	Asymptotic expansions with a second parameter	81
	Further results and exercises	83
	Bibliographic notes	88
4	Edgeworth and allied expansions	90
4.1	Introduction	90
4.2	Direct Edgeworth expansion	90
4.3	Tilted Edgeworth expansion	104
4.4	Cornish–Fisher inversion	117
4.5	Nonlinear functions of sums	121
	Further results and exercises	123
	Bibliographic notes	130
5	Miscellany on multivariate distributions	131
5.1	Introduction	131
5.2	Special properties	133
5.3	Index notation	136
5.4	The exlog relations	140
5.5	Cumulants and moments	143
5.6	Cumulants of power series	147
5.7	Appendix: Tensorial Hermite polynomials	148
5.8	Appendix: Partially ordered sets, partitions and Möbius inversion	153
5.9	Appendix: Proof of the exlog relations	158
	Further results and exercises	160
	Bibliographic notes	167
6	Multivariate asymptotic expansions	169
6.1	Introduction	169
6.2	Laplace's method	169
6.3	Edgeworth expansions	173

6.4	Exponential models	178
6.5	Tilted expansions	181
6.6	Large deviations	184
6.7	Mixed tilted–direct Edgeworth expansions	186
6.8	The delta method	187
6.9	Generalized formal Edgeworth expansions	195
6.10	Inversion	196
6.11	Appendix: Fourier transformation	201
6.12	Appendix: Laplace’s method: regularity conditions	204
6.13	Appendix: Direct and tilted Edgeworth expansions: regularity conditions	205
6.14	Appendix: Legendre transformation	211
	Further results and exercises	213
	Bibliographic notes	218
7	Expansions for conditional distributions	220
7.1	Introduction	220
7.2	Direct–direct expansions	221
7.3	Expansions for conditional cumulants	223
7.4	Tilted–tilted expansions	225
7.5	Mixed expansions	226
	Further results and exercises	228
	Bibliographical notes	230
	Postscript	231
	References	233
	Author index	244
	Subject index	247
