CONTENTS

List	of Basic Notations and Assumptions	xv
Intro	Introduction to the English Edition	
Char	oter 1. Generalized Wishart Density and Integral	
•	Representation for Determinants	1
§1.	The Haar Measure	1
§2.	The Haar Measure On the Group of Orthogonal Matrices	4
§3.	The Generalized Wishart Density	7
§4.	Integral Representations for Determinants	16
§ 5.	Integration on Grassmann and Clifford Algebras	19
Chap	oter 2. Moments of Random Matrix Determinants	22
§1 .	Moments of Random Gram Matrix Determinants	22
§2 .	Moments of Random Vandermond Determinants.	
	Hypothesis by Mehta and Dyson	29
§3.	Methods of Calculating the Moments of Random Determinants	43
§4 .	Moments of Random Permanents	46
§ 5.	Formulas of Random Determinant Perturbation	48
Chap	oter 3. Distribution of Eigenvalues and Eigenvectors	
	of Random Matrices	54
§1.	Distribution of Eigenvalues and Eigenvectors of	
Ů	Hermitian Random Matrices	54
§2 .	Distribution of the Eigenvalues and Eigenvectors of	-
J	Antisymmetric Random Matrices	62
§3 .	Distribution of Eigenvalues and Eigenvectors of	
J	Nonsymmetric Random Matrices	67
§4 .	Distribution of the Eigenvalues and Eigenvectors of	
u	Complex Random Matrices	72
§ 5.	Distribution of Eigenvalues of Gaussian Real	
.	Random Matrices	78
§6.	Distribution of Eigenvalues and Eigenvectors of	
•	Unitary Random Matrices	84
	-	

viii Contents

§7.	Distribution of Eigenvalues and Eigenvectors of	
	Orthogonal Random Matrices	87
§8.	Distribution of Roots of Algebraic Equations	
	with Random Coefficients	93
Chap	oter 4. Inequalities for Random Determinants	102
§1.	The Stochastic Hadamard Inequality	102
§2.	Inequalities for Random Determinants	105
§3.	The Frechet Hypothesis	110
§4.	On Inequalities for Sums of the Martingale Difference and	
·	Random Quadratic Forms	112
Char	oter 5. Limit Theorems for the Borel Functions of	
	Independent Random Variables	114
§1.	Limit Theorems with the Lindeberg Condition	114
§2.	_	
J	Independent Random Variables	119
§3.	Accompanying Infinitely Divisible Distributions for Borel	110
30.	Functions of Independent Random Variables	128
§4 .	Limit Theorems for Sums of Martingale Differences	134
§5.	Limit Theorems for Sums of Martingale Differences in	101
30.	Nonclassical Situations	158
§6.	Limit Theorems for Generalized U Statistics	161
§7.	Central Limit Theorem for Some Functionals of Random Walk	164
§8.	Limit Theorems for Sums of Random Variables Connected	101
yo.	in a Markov Chain	167
Cl	- Lund Timit (DL	
Chaj	pter 6. Limit Theorems of the Law of Large Numbers and	170
	Central Limit Theorem Types for Random Determinants	170
§1.	Limit Theorems of the Law of Large Numbers Type	
	for Random Determinants	170
§2.	The Perturbation Method	174
§3.	The Orthogonalization Method	188
§4.	-	199
§5.	The Central Limit Theorem for the Determinants of	
·	Random Matrices of Finite Order	202
Cha	pter 7. Accompanying Infinitely Divisible Laws	
	for Random Determinants	204
§1.	Perturbation Method and Accompanying Infinitely Divisible	
21.	Laws for Random Determinants	204
§2 .		201
J.	Infinitely Divisible Laws	213

Contents	ix

§3.	Central Limit Theorem for Random Permanents	215
Chap	oter 8. Integral Representation Method	218
§1.	Limit Theorem for the Random Analytical Functions	218
§2.	Limit Theorems for Random Determinants	220
§3.	Method of Integral Representations and Accompanying	
Ū	Infinitely Divisible Laws	235
§4 .	Limit Theorems of the General Form for Random Determinants	247
§5.	Limit Theorems for the Determinants of Random Matrices	
0	with Dependent Random Elements	252
Chap	eter 9. The Connection between the Convergence of	
	Random Determinants and the Convergence of	
	Functionals of Random Functions	255
		200
§1 .	The Method of Integral Representations and Limit Theorems	
	for Functionals of Random Functions	255
§2 .	The Spectral Functions Method of Proving Limit Theorems	
0.0	for Random Determinants	263
§3.	The Canonical Spectral Equation	269
§4.	The Wigner Semicircle Law	282
§ 5.	The General Form of Limit Spectral Functions	289
§ 6.	Normalized Spectral Functions of Symmetric Random Matrices	
	with Dependent Random Entries	295
Chap	ter 10. Limit Theorems for Random Gram Determinants	297
§1.	Spectral Equation for Gram Matrices	297
§2.	Limit Theorems for Random Gram Determinants with	201
3~·	Identically Distributed Elements	302
§3.	Limit Spectral Functions	305
30.	min product unoutding	000
Chan	ter 11. The Determinants of Toeplitz and Hankel	
_	Random Matrices	309
_		
§1.	• • • • • • • • • • • • • • • • • • • •	309
§2 .	The Method of Integral Representations for Determinants	
	of Toeplitz and Hankel Random Matrices	312
§3.	The Stochastic Analogue of the Szegö Theorem	315
§4 .	The Method of Perturbation for Determinants of some	
	Toeplitz Random Matrices	318
Cha-	ton 19 Limit Theorems for Determinants of Day Jam	
_	ter 12. Limit Theorems for Determinants of Random	961
•	Jacobi Matrices	321
§1 .	Limit Theorems of the Law of Large Numbers Type	321
	-	

x Contents

§2.	The Dyson Equation	323
§3.	The Stochastic Sturm-Liouville Problem	333
§4 .	The Sturm Oscillation Theorem	337
§5 .	The Central Limit Theorem for Determinants of Random Jacobi Matrices	339
§ 6.	The Central Limit Theorem for Normalized Spectral Functions of Random Jacobi Matrices	342
		0.2
Char	oter 13. The Fredholm Random Determinants	347
§1.	Fredholm Determinants of Symmetric Random Matrices	349
§2 .	Limit Theorems for Eigenvalues of Symmetric Random Matrices	351
§3.	Fredholm Determinants of Nonsymmetric Random Matrices	
	and Limit Theorems for Eigenvalues	361
§4 .	Fredholm Determinants of Random Linear Operators	
	in the Hilbert Space	364
Char	oter 14. The Systems of Linear Algebraic Equations	
	with Random Coefficients	366
§1.		366
§2.	The Stochastic Method of Least Squares	370
§3.	Spectral Method for the Calculation of Moments of Inverse	
	Random Matrices	372
Char	oter 15. Limit Theorems for the Solution of the Systems of	
	Linear Algebraic Equations with Random Coefficients	377
§1.	The Arctangent Law	377
§2.	Method of Integral Representations of the Solution of	٠
Ů	Systems of Linear Random Algebraic Equations	381
§3 .	The Resolvent Method of Solutions of the Systems of	001
•	Linear Random Algebraic Equations	383
§4.	Limit Theorems for Solutions of Difference Equations	388
•	The second secon	000
Chap	oter 16. Integral Equations with Random Degenerate Kernels	391
§1.	Fredholm Integral Equations with Degenerate Random Kernels	391
§2 .	Limit Theorem for Normalized Spectral Functions	396
§3.	Limit Theorems for Spectral Functions of Integral Equations	
	with Random Kernels	398
Chap	oter 17. Random Determinants in the Spectral Theory of	
	Non-Self-Adjoint Random Matrices	401
§1.	Limit Theorems for the Normalized Spectral Functions of	
21.	Complex Gaussian Matrices	401
	Complex Gaussian Matrices	401

Contents xi

§2 .	The V-Transform of Spectral Functions	404
§3.	Limit Theorems like the Law of Large Numbers for Normalized	
-	Spectral Functions of Non-Self-Adjoint Random Matrices	
	with Independent Entries	407
§4 .	The Regularized V-Transform for Spectral Functions	411
§5.	An Estimate of the Rate of Convergence of the Stielties	
· ·	Transforms of Spectral Functions to the Limit Function	414
§6.	The Estimates of the Deviations of Spectral Functions from	
0 -	the Limit Functions	425
§7.	The Circle Law	428
§8.	The Elliptic Law	431
§9.	Limit Theorems for the Spectral Functions of Non-Self-Adjoint	101
30.	Random Jacobi Matrices	433
§10.	The Unimodal Law	437
3.40.	The Offinional Daw	101
Cha	pter 18. The Distribution of Eigenvalues and Eigenvectors of	
Ona	Additive Random Matrix-Valued Processes	442
	Additive Random Matrix-valued Processes	442
§1.	Distribution of Eigenvalues and Eigenvectors of	
	Random Symmetric Matrix-Valued Processes	442
§2.	Perturbation Formulas	443
§3.	Continuity and Nondegeneration of Eigenvalues of Random	
•	Matrix-Valued Processes with Independent Increments	446
§4 .	Straight and Back Spectral Kolmogorov Equations for	
·	Distribution Densities of Eigenvalues of Random Matrix	
	Processes with Independent Increments	451
§ 5.	Spectral Stochastic Differential Equations for Random Symmetric	
V -	Matrix Processes with Independent Increments	456
§6.	Spectral Stochastic Differential Equations for Random	
3.	Matrix-Valued Processes with Multiplicative	
	Independent Increments	461
§7.	Stochastic Differential Equations for Differences of	
3	Eigenvalues of Random Matrix-Valued Processes	463
§8.	Resolvent Stochastic Differential Equation for Self-Adjoint	100
30.	Random Matrix-Valued Processes	465
§9.	Resolvent Stochastic Differential Equation for Non-Self-Adjoint	100
30.	Random Matrix-Valued Processes	466
	Transform Wightin- Valued 1 Toccoses	100
Char	oten 10 The Stachestic Lienungy Problem for Systems of	
	pter 19. The Stochastic Ljapunov Problem for Systems of	468
	Stationary Linear Differential Equations	400
§1.	The Stochastic Ljapunov Problem for Systems of Linear	
	Differential Equations with the Symmetric Matrix of	
	Coefficients	468
§2.	Hyperdeterminants	470

xii Contents

33.	The Stochastic Ljapunov Problem for Systems of Linear	
	Differential Equations with a Nonsymmetric Matrix of	
	Coefficients	471
§4.	The Spectral Method of Calculating a Probability of	
•	Stationary Stochastic Systems Stability	472
§ 5.	The Resolvent Method of Proving the Stability of the	
30.	Solutions of Stochastic Systems	473
§6.	The Spectral Method of Calculating Mathematical	110
30.	-	476
67	Expectations of Exponents of Random Matrices	
§7.	Method of Stochastic Diffusion Equations	478
	oter 20. Random Determinants in the Theory of Estimation	
	of Parameters of Some Systems	481
§1.	The Estimation of Solutions of Equation Systems with	
-	Multiplicative Errors in the Series of Observation	481
§2 .	Spectral Equations for Minimax Estimations of	
J	Parameters of Linear Systems	484
§3 .	The Estimation of the Parameters of Stable Discrete	10 1
30.	Control Systems	106
6.4	•	486
§4.	The Parameter Estimation of Nonlinear Control Systems	491
§5 .	Limit Theorems of the General Form for the Parameter	
	Estimation of Discrete Control Systems	495
§6.	Limit Theorem for Estimating Parameters of Discrete	
	Control Systems with Multiplicative Noises	498
§7.	Estimating Spectra of Stochastic Linear Control Systems	
	and Spectral Equations in the Theory of the	
	Parameters Estimation	499
~		
	oter 21. Random Determinants in Some Problems of	
	Control Theory of Stochastic Systems	503
§1.	The Kalman Stochastic Condition	509
-		503
§2 .		
	in Hilbert Spaces	508
§3.		518
§4 .	The Perturbation Method of Linear Operators in the Theory	
	of Optimal Control of Stochastic Systems	524
Char	oter 22. Random Determinants in Some Linear Stochastic	
	Programming Problems	527
		021
§1.	0	528
§2 .		
	Linear Stochastic Programming	529

	Contents	xiii
§3 .	Integral Representation Method for Solving Linear Stochastic Programming Problems	535
Char	oter 23. Random Determinants in General Statistical Analysis	539
§1 .	The Equation for Estimation of Parameters of Fixed	
60	Functions	540
§2 .	The Equations for Estimation of Twice-Differentiable	F 46
§3.	Functions of Unknown Parameters The Oversity Parameters The Oversity Parameters The Oversity Parameters	542
§3. §4.	The Quasiinversion Method for Solving G_1 -Equations The Fourier Transformation Method	543
§5.	Equations for Estimations of Functions of Unknown	545
30.	Parameters	547
§6.	G-Equations of Higher Orders	549
§7.	G-Equation for the Resolvent of Empirical Covariance	0.10
•	Matrices if the Lindeberg Condition Holds	550
§8.	G-Equation for the Stieltjes Transformation of Normal Spectral	
-	Functions of the Empirical Covariance Matrices Beam	557
§ 9.	G_1 -Estimate of Generalized Variance	565
§10.	G_2 -Estimate of the Stieltjes Transform of the Normalized	
	Spectral Function of Covariance Matrices	568
§11.	G_3 -Estimation of the Inverse Covariance Matrix	577
$\S 12$.	G ₄ -Estimates of Traces of Covariance Matrix Powers	580
§13.	G_5 -Estimates of Smoothed Normalized Spectral Functions	
	of Empirical Covariance Matrices	581
§14.	Parameter Estimation of Stable Discrete Control Systems	
	under G -Conditions	583
Chan	eter 24. Estimate of the Solution of the Kolmogorov-Wiener	
	Filter	588
§1.	The G_9 -Estimate of the Solution of the Kolmogorov-Wiener	F00
co.	Filter	589
§2 .	Asymptotic Normality of the G_9 -Estimate of the Solution of the Volumes G_9 -Estimate of the Solution	501
co	of the Kolmogorov-Wiener Equation	591
§3 .	The G_{10} -Estimate of the Solution of the Regularized Kolmogorov-Wiener Filter	593
	Konnogorov-whener rinter	000
Chap	ster 25. Random Determinants in Pattern Recognition	595
§1.	The Bayes Method for Classification of Two Populations	595
§2.	Observation Classifications in the Case of Two Populations	300
J	Having Known Multivariate Normal Distributions with	
	Identical Covariance Matrices	597
§3 .	The G_{11} -Estimate of the Mahalanobis Distance	598
§4.	Asymptotic Normality of Estimate G_{11}	600
	· · · · · · · · · · · · · · · · ·	

xiv Contents

 §5. The G₁₂-Estimate of the Regularized Mahalanobis Distance §6. The G₁₃-Anderson-Fisher Statistics Estimate §7. The G₁₅-Estimate of the Nonlinear Discriminant Function, Obtained by Observations over Random Vectors with 	601 611
Different Covariance Matrices	615
Chapter 26. Random Determinants in the Experiment Design	616
§1. The Resolvent Method in the Theory of Experiment Design §2. The G_{16} -Estimate of the Estimation Errors in the Theory of	617
the Design of Experiments	624
Chapter 27. Random Determinants in Physics	627
§1. The Wigner Hypothesis	627
§2. Some Properties of the Stochastic Scattering Matrix §3. Application of Random Determinants in Some Mathematical	635
Models of Solid-State Physics	642
Chapter 28. Random Determinants in Numerical Analysis	644
§1. Consistent Estimations of the Solutions of Systems of Linear Algebraic Equations, Obtained during Observations of	
Independent Random Coefficients with Identical Variances	645
§2. Consistent Estimations of the Solutions of a System of Linear	
Algebraic Equations with a Symmetric Matrix of Coefficients	655
References	657
