

# Contents

Notation	ix
<b>1 Introduction</b>	<b>1</b>
1.1 The Evaluation of Multivariate Integrals . . . . .	1
1.2 Structural Reliability . . . . .	2
1.3 Stochastic Optimization . . . . .	6
1.4 Large Deviations and Extreme Values . . . . .	7
1.5 Mathematical Statistics . . . . .	7
1.6 Contents of this Lecture Note . . . . .	8
<b>2 Mathematical Preliminaries</b>	<b>9</b>
2.1 Results from Linear Algebra . . . . .	9
2.2 Results from Analysis . . . . .	11
2.3 Manifolds . . . . .	14
2.4 Extrema under Constraints . . . . .	16
2.5 Parameter Dependent Integrals . . . . .	21
2.6 Probability Distributions . . . . .	28
2.6.1 Univariate distributions . . . . .	28
2.6.2 The $n$ -dimensional normal distribution . . . . .	29
2.6.3 Calculation of normal integrals . . . . .	30
2.7 Convergence of Probability Distributions . . . . .	31
<b>3 Asymptotic Analysis</b>	<b>34</b>
3.1 The Topic of Asymptotic Analysis . . . . .	34
3.2 The Comparison of Functions . . . . .	35
3.3 Asymptotic Power Series and Scales . . . . .	40
3.4 Deriving Asymptotic Expansions . . . . .	44
<b>4 Univariate Integrals</b>	<b>45</b>
4.1 Introduction . . . . .	45
4.2 Watson's Lemma . . . . .	45
4.3 The Laplace Method for Univariate Functions . . . . .	47

<b>5</b>	<b>Multivariate Laplace Type Integrals</b>	<b>51</b>
5.1	Introduction . . . . .	51
5.2	Basic Results . . . . .	52
5.3	Interior Maxima . . . . .	55
5.4	Boundary Maxima . . . . .	65
<b>6</b>	<b>Approximations for Normal Integrals</b>	<b>85</b>
6.1	Time-Invariant Reliability Problems . . . . .	85
6.2	Linear Approximations (FORM Concepts) . . . . .	86
6.2.1	The Hasofer/Lind reliability index . . . . .	86
6.2.2	Generalization to non-normal random variables . . . . .	88
6.3	SORM Concepts . . . . .	90
6.4	Asymptotic SORM for Normal Integrals . . . . .	91
6.4.1	The generalized reliability index . . . . .	98
6.5	The Asymptotic Distribution in the Failure Domain . . . . .	99
6.6	Numerical Procedures and Improvements . . . . .	102
6.7	Examples . . . . .	103
<b>7</b>	<b>Arbitrary Probability Integrals</b>	<b>106</b>
7.1	Problems of the Transformation Method . . . . .	106
7.2	Asymptotic Approximations in the Original Space . . . . .	109
7.2.1	The construction of Laplace integrals . . . . .	109
7.2.2	Examples . . . . .	112
7.3	Sensitivity analysis . . . . .	115
7.3.1	Parameter dependent densities . . . . .	115
7.3.2	Example . . . . .	118
<b>8</b>	<b>Crossing Rates of Stochastic Processes</b>	<b>121</b>
8.1	Introduction . . . . .	121
8.2	Definition and Properties of Stochastic Processes . . . . .	121
8.3	Maxima and Crossings of a Stochastic Process . . . . .	124
8.4	Crossings through an Hypersurface . . . . .	127
8.4.1	Examples . . . . .	133
<b>A</b>	<b>Bibliography</b>	<b>135</b>
<b>B</b>	<b>Index</b>	<b>145</b>
