Preface	vii
Part I Introduction	1
Chapter 1 Definitions and Basic Inequalities	3
1.1 Definitions	3
1.2 Basic inequalities	7
Chapter 2 Moment Estimations of Partial Sums	15
2.1 Variances of partial sums	15
2.2 Further inequalities	24
Part II Weak Convergence	39
Chapter 3 Weak Convergence for α -mixing Sequences	41
3.1 Necessary and sufficient conditions for the CLT	41
3.2 Sufficient conditions for CLT and WIP	51
3.3 The CLT and WIP when the variance is infinite	63
Chapter 4 Weak Convergence for ρ -mixing Sequences	71
4.1 The WIP when the moments of order 2 are finite	73
4.2 The WIP when moments of higher than two orders	78
4.3 A generalized result when moments of higher than two orders	88
4.4 The WIP when the variance is infinite	104
Chapter 5 Weak Convergence for φ -mixing Sequences	123
5.1 The WIP when the moments of order 2 are finite	124
5.2 The Ibragimov-Linnik-Iosifescu conjecture	136
Chapter 6 Weak Convergence for Mixing Random Fields	141
6.1 The CLT for mixing random fields	141
6.2 Convergence of finite dimensional distributions	149
6.3 Tightness	160

Chapter 7	The Berry-Esseen Inequality and the Rate of Weak Convergence.....	169
7.1	Rate of convergence in distribution for α -mixing and ρ -mixing sequences.....	169
7.2	The rate of weak convergence for a φ -mixing sequence.....	181
Part III	Almost Sure Convergence and Strong Approximations.....	189
Chapter 8	Laws of Large Numbers and Complete Convergence....	191
8.1	Weak law of large numbers.....	191
8.2	Strong laws of large numbers.....	199
8.3	Complete convergence for φ -mixing sequences.....	201
8.4	Complete convergence for ρ -mixing sequences.....	208
8.5	Complete convergence for α -mixing sequences.....	222
8.6	A further discussion on the complete convergence.....	231
Chapter 9	Strong Approximations.....	241
9.1	Strong approximations for a φ -mixing sequence.....	241
9.2	Strong approximations for a ρ -mixing sequence.....	247
9.3	Strong approximations for a α -mixing sequence.....	263
Chapter 10	The Increments of Partial Sums.....	269
10.1	Some lemmas.....	269
10.2	How big are the increments when the moment generation functions exist?.....	277
10.3	How big are the increments when the moment generating functions do not exist?.....	283
Chapter 11	Strong Approximations for Mixing Random Fields....	287
11.1	Strong approximations of a φ -mixing random field.....	288
11.2	Strong approximations of a α -mixing random fields.....	301
Part IV	Statistics of a Dependent Sample.....	309
Chapter 12	Empirical Processes.....	311
12.1	Weak convergence.....	312
12.2	Weighted weak convergence.....	317
12.3	Strong approximations.....	331
12.4	Moduli of continuity of empirical processes.....	341

Chapter 13	Convergence of Some Statistics with a Mixing Sample	347
13.1	U-Statistics	347
13.2	Error variance estimations in linear models	360
13.3	Density estimations	369
Chapter 14	Strong Approximations for Other Kinds of Dependent Random Variables	379
14.1	Lacunary trigonometric series with weights	379
14.2	A class of Gaussian sequences	392
14.3	The non-negative additive functional of a Markov process ...	397
Appendix	406
References	409
Index	425
