Preface

vii

Notations and Abbreviations

ix

CHAPTER 1

Preliminary Analysis

| | | |
|------|---|----|
| 1.0. | Introduction | 1 |
| 1.1. | Events and Probability Measure | 1 |
| 1.2. | Random Variables, Distribution Functions, and Expectations | 3 |
| 1.3. | Convergence of Random Sequences | 6 |
| 1.4. | Conditional Probabilities and Expectations | 10 |
| 1.5. | Random Processes | 12 |
| 1.6. | Separability of Random Processes | 18 |
| 1.7. | Deterministic Comparison Theorems | 19 |
| | Notes | 20 |

CHAPTER 2

Sample Calculus Approach

| | | |
|-------|---------------------------------------|----|
| 2.0. | Introduction | 21 |
| 2.1. | Sample Calculus | 22 |
| 2.2. | Existence and Continuation | 30 |
| 2.3. | Random Differential Inequalities | 37 |
| 2.4. | Maximal and Minimal Solutions | 39 |
| 2.5. | Random Comparison Principle | 41 |
| 2.6. | Uniqueness and Continuous Dependence | 42 |
| 2.7. | The Method of Variation of Parameters | 50 |
| 2.8. | Random Lyapunov Functions | 56 |
| 2.9. | Scope of Comparison Principle | 60 |
| 2.10. | Stability Concepts | 69 |
| 2.11. | Stability in Probability | 72 |
| 2.12. | Stability with Probability One | 80 |
| 2.13. | Stability in the p th Mean | 88 |
| | Notes | 91 |

CHAPTER 3

L^p-Calculus Approach

| | | |
|------|---|-----|
| 3.0. | Introduction | 92 |
| 3.1. | <i>L^p-Calculus</i> | 93 |
| 3.2. | Interrelationships between Sample and <i>L^p</i> -Solutions | 95 |
| 3.3. | Existence and Uniqueness | 97 |
| 3.4. | Continuous Dependence | 105 |
| 3.5. | Comparison Theorems | 108 |
| 3.6. | Stability Criteria | 110 |
| | Notes | 112 |

CHAPTER 4

Itô–Doob Calculus Approach

| | | |
|-------|---------------------------------------|-----|
| 4.0. | Introduction | 113 |
| 4.1. | Itô's Calculus | 114 |
| 4.2. | Existence and Uniqueness | 131 |
| 4.3. | Continuous Dependence | 142 |
| 4.4. | The Method of Variation of Parameters | 149 |
| 4.5. | Stochastic Differential Inequalities | 152 |
| 4.6. | Maximal and Minimal Solutions | 157 |
| 4.7. | Comparison Theorems | 159 |
| 4.8. | Lyapunov-Like Functions | 160 |
| 4.9. | Stability in Probability | 166 |
| 4.10. | Stability in the <i>p</i> th Mean | 172 |
| 4.11. | Stability with Probability One | 175 |
| | Notes | 178 |

Appendix

| | | |
|------|---|-----|
| A.0. | Introduction | 180 |
| A.1. | Moments of Random Functions | 180 |
| A.2. | Spectral Representations of Covariance and Correlation Functions | 183 |
| A.3. | Some Properties of Gaussian Processes | 186 |
| A.4. | Brownian Motion | 188 |
| A.5. | Martingales | 189 |
| A.6. | Metrically Transitive Processes | 191 |
| A.7. | Markov Processes | 195 |
| A.8. | Closed Graph Theorem | 200 |
| | Notes | 201 |
