| <i>Preface to the First Edition</i> | <i>page xi</i> |
| <i>Preface to the Second Edition</i> | <i>page xv</i> |
| <i>Preface to the Third Edition</i> | <i>page xvii</i> |
| Chapter 1. GENERAL INTRODUCTION | |
| §1-1 Preliminary remarks | 1 |
| 1-2 Elements of probability theory | 2 |
| 1-21 Distribution functions and their properties | 4 |
| 1-3 Theoretical classification and specification of stochastic processes | 9 |
| 1-31 The characteristic functional | 13 |
| Chapter 2. RANDOM SEQUENCES | |
| 2-1 The random walk | 15 |
| 2-11 Renewals | 21 |
| 2-2 Markov chains | 24 |
| 2-21 Classification by asymptotic behaviour | 30 |
| 2-22 Nearest neighbour systems | 34 |
| 2-23 Wald's identity for Markov chains | 39 |
| 2-3 Multiplicative chains | 41 |
| 2-31 Extinction probabilities for variable environments | 46 |
| Chapter 3. PROCESSES IN CONTINUOUS TIME | |
| 3-1 The additive process | 49 |
| 3-2 Markov chains | 54 |
| 3-3 Recurrence and passage times for renewal processes | 60 |
| 3-31 Ergodic properties | 70 |
| 3-32 Alternative method for Markov chains | 73 |
| 3-4 Multiplicative chains | 75 |
| 3-41 The effect of immigration | 82 |
| 3-42 Point processes | 84 |

| | | |
|--|--|---------|
| 3·5 | General equations for Markov processes | page 89 |
| 3·51 | Multidimensional diffusion equations with radial symmetry | 97 |
| <i>Chapter 4. MISCELLANEOUS STATISTICAL APPLICATIONS</i> | | |
| §4·1 | Some applications of the random walk or additive process | 101 |
| 4·2 | Simple renewal as a Markov process | 108 |
| 4·21 | Queues | 110 |
| 4·22 | Theory of storage | 119 |
| 4·3 | Population growth as a multiplicative process | 123 |
| 4·31 | Growth and mutation in bacterial populations | 130 |
| 4·32 | Population genetics | 137 |
| 4·4 | Epidemic models | 141 |
| <i>Chapter 5. LIMITING STOCHASTIC OPERATIONS</i> | | |
| 5·1 | Stochastic convergence | 153 |
| 5·11 | Stochastic differentiation and integration | 157 |
| 5·2 | Stochastic linear difference and differential equations | 162 |
| 5·21 | Relations between direct stochastic equations and distribution equations | 170 |
| 5·22 | Equations for stochastic path integrals | 176 |
| 5·3 | Approximating and limiting solutions dependent on a parameter | 179 |
| <i>Chapter 6. STATIONARY PROCESSES</i> | | |
| 6·1 | Processes stationary to the second order | 182 |
| 6·11 | The spectral function | 184 |
| 6·12 | Stationary point processes and covariance densities | 189 |
| 6·13 | The spectra of stationary point processes | 191 |
| 6·2 | Generalized harmonic analysis | 194 |
| 6·21 | The ergodic property | 197 |
| 6·3 | Processes with continuous spectra | 199 |
| 6·31 | Further examples of stationary processes | 203 |
| 6·4 | Complete stationarity | 205 |
| 6·41 | Recurrence times for completely stationary processes | 208 |

| | | |
|--|---|-----------------|
| 6.5 | Multivariate and multidimensional stationary processes | <i>page</i> 215 |
| 6.51 | Isotropy and other special conditions | 218 |
| 6.52 | Two-dimensional point and line processes | 223 |
| 6.53 | Stationary processes on the circle and sphere | 229 |
| 6.54 | Lattice models and Markov fields | 231 |
| <i>Chapter 7. PREDICTION AND COMMUNICATION THEORY</i> | | |
| §7.1 | Linear prediction for stationary processes | 237 |
| 7.11 | Further associated problems | 242 |
| 7.12 | Regulation and control | 247 |
| 7.2 | Theory of information and communication | 249 |
| 7.21 | Communication systems | 251 |
| <i>Chapter 8. THE STATISTICAL ANALYSIS OF STOCHASTIC PROCESSES</i> | | |
| 8.1 | Principles of statistical inference | 264 |
| 8.11 | Application to stochastic processes | 269 |
| 8.2 | The analysis of probability chains | 271 |
| 8.21 | Goodness of fit of marginal frequency distributions | 281 |
| 8.22 | Analysis of two-dimensional chains | 283 |
| 8.3 | Estimation problems | 285 |
| 8.31 | Further examples of the use of the likelihood function | 297 |
| <i>Chapter 9. CORRELATION ANALYSIS OF TIME-SERIES</i> | | |
| 9.1 | Correlation and regression analysis of stationary sequences | 300 |
| 9.11 | Goodness of fit tests | 306 |
| 9.12 | Time-series specified for continuous time | 312 |
| 9.13 | Numerical examples | 316 |
| 9.2 | Harmonic (periodogram) analysis | 321 |
| 9.21 | Smoothing techniques in relation to the mean square error | 331 |
| 9.22 | Further notes and problems related to the spectrum | 335 |
| 9.23 | The spectral analysis of point processes | 342 |

| | | |
|------|--|-----------------|
| 9·3 | Multivariate autoregressive series | <i>page</i> 352 |
| 9·4 | Multidimensional series | 358 |
| 9·41 | The analysis of multidimensional point processes | 361 |
| 9·42 | The analysis of multidimensional lattice models | 362 |
| | <i>Bibliography</i> | 365 |
| | <i>Glossary of stochastic processes</i> | 381 |
| | <i>Index</i> | 383 |
