1	INTRODUCTION	
1.1	An Introduction to Stochastic Analysis <i>D. G. Kendall</i>	3
2	DELPHIC SEMIGROUPS, AND RELATED ARITHMETIC PROBLEMS	
2.1	Renewal Sequences and their Arithmetic <i>D. G. Kendall</i>	47
2.2	Delphic Semigroups, Infinitely Divisible Regenerative Phenomena, and the Arithmetic of p -functions <i>D. G. Kendall</i>	73
2.3	Arithmetic and Other Properties of Certain Delphic Semigroups: I <i>R. Davidson</i>	115
2.4	Arithmetic and Other Properties of Certain Delphic Semigroups: II <i>R. Davidson</i>	150
2.5	More Delphic Theory and Practice <i>R. Davidson</i>	183
2.6	Sorting Vectors <i>R. Davidson</i>	201
2.7	Sur un Problème Relatif aux Suites Récurrentes Monotones <i>R. Davidson</i>	208
2.8	Amplification of Some Remarks of Lévy concerning the Wishart Distribution <i>R. Davidson</i>	212
3	REGENERATIVE PHENOMENA AND THEIR p -FUNCTIONS	
3.1	Another Approach to one of Bloomfield's Inequalities. <i>R. Davidson</i>	223

xii	<i>Contents</i>
3.2 Stochastic Inequalities for Regenerative Phenomena	226
<i>P. Bloomfield</i>	
3.3 Smith's Phenomenon, and 'Jump' p -functions	234
<i>R. Davidson</i>	
3.4 On Partly Exponential p -functions, and 'Identifying' Skeletons	248
<i>R. Davidson and D. G. Kendall</i>	
3.5 Multiplicative Semigroups and p -functions	252
<i>A. M. Sykes</i>	
3.6 Limit Theorems for a Class of Markov Processes: Some Thoughts on a Postcard from Kingman	266
<i>N. H. Bingham</i>	
3.7 On the Non-occurrence of a Regenerative Phenomenon in Given Intervals	294
<i>D. G. Kendall</i>	
 4 MARKOVIAN AND OTHER STOCHASTIC PROCESSES 	
4.1 An Expression for Canonical Entrance Laws	311
<i>K. L. Chung</i>	
4.2 Some Algebraic Results and Problems in the Theory of Stochastic Processes with a Discrete Time Parameter.	315
<i>J. F. C. Kingman</i>	
4.3 Partial Sums of Matrix Arrays, and Brownian Sheets	331
<i>R. Pyke</i>	
4.4 Some Basic Theorems on Harnesses	349
<i>D. Williams</i>	
 5 SURVEYS OF SPECIAL TOPICS 	
5.1 Determination of Confounding	367
<i>R. Davidson</i>	
5.2 On the Numerical Range of an Operator	374
<i>B. Bollobás</i>	
5.3 Sample Path Properties of Processes with Stationary Independent Increments	387
<i>S. J. Taylor</i>	
5.4 Separability and Measurability for Stochastic Processes: A Survey	415
<i>D. G. Kendall</i>	

6 CONCLUSION

6.1	Letter to F. Papangelou, Easter Day, 1970.	. . .	447
	<i>R. Davidson</i>		
6.2	Rollo Davidson: 1944-1970	449
	<i>E. F. Harding and D. G. Kendall</i>		
	<i>Author Index</i>	453
	<i>Subject Index</i>	457
