

# CONTENTS

Preface	iii
Chapter 1: STOCHASTIC PROCESSES	1
§ 1. Stochastic Processes	1
§ 2. Existence of a Stochastic Process with a Given System of Finite Dimensional Probability Distributions	3
§ 3. Stochastically Continuous Processes	21
§ 4. Separable Processes	26
§ 5. Measurable Processes	39
§ 6. Continuous Processes	49
§ 7. Infinite Dimensional Random Vectors	59
Chapter 2: MARTINGALES	76
§ 8. Conditional Expectation and Conditional Probability	76
§ 9. Martingales	89
§ 10. Uniform Integrability	108
§ 11. Martingale Closing Theorems	135
Chapter 3: ADDITIVE PROCESSES	141
§ 12. Additive Processes	141
§ 13. Brownian Motion Processes	159
§ 14. Continuous Additive Processes	182
§ 15. Poisson Processes	208
Chapter 4: GAUSSIAN PROCESSES	225
§ 16. Gaussian Systems of Random Variables	225
§ 17. Brownian Motion Process as Gaussian Process	255
§ 18. The Integral Operator with Kernel $\min\{s, t\}$	268
§ 19. Orthogonal Expansions of Gaussian Processes	279
§ 20. A Strong Limit Theorem for Gaussian Processes	294
§ 21. Continuity and Differentiability of Sample Functions of a Gaussian Process	306

Chapter 5:	STOCHASTIC INTEGRALS	316
§ 22.	Stochastic Integral of a Function . . . . .	316
§ 23.	Orthogonal Expansions of Brownian Motion Processes . . . . .	326
§ 24.	Stochastic Integrals . . . . .	338
Chapter 6:	GAUSSIAN MEASURES IN FUNCTION SPACES	377
§ 25.	The J-Divergence between Two Probability Measures . . . . .	377
§ 26.	Equivalence and Singularity of Gaussian Measures on a Function Space . . . . .	392
Chapter 7:	WIENER MEASURE AND WIENER INTEGRAL	414
§ 27.	Wiener Measure . . . . .	414
§ 28.	Wiener Measure on the Space of Continuous Functions . . . . .	423
§ 29.	Wiener Integral . . . . .	437
§ 30.	Uniform Topology and Wiener Measurability. .	449
Chapter 8:	TRANSFORMATIONS OF WIENER INTEGRALS . . . . .	453
§ 31.	Probability Measure Induced in the Wiener Space by a Transformation of the Wiener Process . . . . .	453
§ 32.	Linear Transformation of the Wiener Space . .	456
§ 33.	Transformation of the Wiener Measure and Wiener Integrals by a Translation . . . . .	461
§ 34.	Transformation of the Wiener Measure and Wiener Integrals by Linear Integral Equations.	485
§ 35.	Evaluation of Wiener Integrals by Means of Sturm-Liouville Differential Equations. . . . .	510
Appendix	. . . . .	521
Bibliography	. . . . .	539
Addenda	. . . . .	543
Index	. . . . .	547
