

CONTENTS

| | | |
|-------|--|----|
| 1. | Definitions and basic properties | 1 |
| 1.1 | A heuristic introduction | 1 |
| 1.2 | The general definition | 3 |
| 1.3 | Doubly stochastic Poisson processes on the real line | 9 |
| 1.3.1 | Recapitulation of the definition | 9 |
| 1.3.2 | An alternative definition | 10 |
| 1.3.3 | Classes of doubly stochastic Poisson processes | 12 |
| 1.3.4 | A definition based on interoccurrence times | 15 |
| 1.4 | Doubly stochastic Poisson sequences | 17 |
| 1.5 | Some basic properties | 18 |
| 1.6 | Second order properties | 22 |
| 1.7 | A characterization of ergodicity | 27 |
| 2. | Some miscellaneous results | 31 |
| 2.1 | The weighted Poisson process | 31 |
| 2.2 | Doubly stochastic Poisson processes and renewal processes | 33 |
| 2.3 | Some reliability models | 40 |
| 2.3.1 | An application on precipitation scavenging of an aerosol particle | 40 |
| 2.3.2 | A model with an intensity generated by a renewal process | 44 |
| 2.3.3 | A model with an intensity generated by an alternating renewal process | 50 |
| 2.4 | Palm probabilities | 53 |
| 2.4.1 | Palm probabilities for doubly stochastic Poisson processes in the general case | 53 |
| 2.4.2 | Some special models | 58 |
| 2.5 | Some random generations | 63 |

| | | |
|-----|---|-----|
| 3. | Characterization and convergence of non-atomic random measures | 65 |
| 4. | Limit theorems | 68 |
| 4.1 | One-dimensional limit theorems | 69 |
| 4.2 | A functional limit theorem | 74 |
| 5. | Estimation of random variables | 86 |
| 5.1 | Non-linear estimation | 87 |
| 5.2 | Linear estimation | 115 |
| 5.3 | Some empirical comparisons between non-linear and linear estimation | 143 |
| 6. | Linear estimation of random variables in stationary doubly stochastic Poisson sequences | 158 |
| 6.1 | Finite number of observations | 158 |
| 6.2 | Asymptotic results | 161 |
| 7. | Estimation of second order properties of stationary doubly stochastic Poisson sequences | 190 |
| 7.1 | Estimation of covariances | 192 |
| 7.2 | Estimation of the spectral density | 195 |
| A1 | Point processes and random measures | 205 |
| A2 | Hilbert space and random variables | 212 |
| A3 | Some time series analysis | 214 |
| | References | 226 |
| | Index | 232 |
