PREFACE

CHAPTER I. SOLUTIONS TO STOCHASTIC DIFFERENTIAL EQUATIONS AS A FUNCTION OF THE STARTING POINT

§ 1. Basic inequalities of martingale theory ..	1
§ 2. Solutions to stochastic differential equations as a function of (t,x) . ..	4
§ 3. Differentiation with respect to x ..	20
§ 4. An application to Partial Differential Equations	26

CHAPTER II. THE TRAJECTORIES OF SOLUTIONS TO STOCHASTIC DIFFERENTIAL EQUATIONS

§ 1. The Martingale Problem ..	31
§ 2. Approximating diffusions by random evolutions	35
§ 3. Characterization of $\text{Supp}(P_x)$, the non-degenerate case ..	49
§ 4. The support of $P_x \sim L$, the degenerate case	62
§ 5. The "most probable path" of a Brownian motion with drift ..	80
BIBLIOGRAPHY ..	91
