

## TABLE OF CONTENTS

Preface	IX
<u>Chapter I : Types of convergence</u>	1
I.1. Introduction	1
I.1.1. Measurable functions	1
I.1.2. Integrable functions	2
I.2. Adapted sequences	6
I.2.1. Definition	6
I.2.2. Conditional expectations	8
I.3. Convergence	10
I.3.1. Pointwise convergence	10
I.3.2. Mean convergence	11
I.3.3. Pettis convergence	11
I.3.4. Convergence in probability	11
I.3.5. Convergence in probability in the stopping time sense	12
I.4. Notes and remarks	18
<u>Chapter II : Martingale convergence theorems</u>	20
II.1. Elementary results	20
II.2. Main results	25
II.3. Convergence of martingales in general Banach spaces	51
II.4. Notes and remarks	63
<u>Chapter III : Sub- and supermartingale convergence theorems</u>	69
III.1. Preliminary results	69
III.2. Heineich's theorem on the convergence of positive submartingales	71
III.3. Convergence of general submartingales	76

III.4. Convergence of supermartingales	87
III.5. Submartingale convergence in Banach lattices without (RNP)	91
III.6. Notes and remarks	93
<u>Chapter IV : Basic inequalities for adapted sequences</u>	97
IV.1. Basic inequalities	98
IV.2. Failure of the inequalities	111
IV.3. Notes and remarks	118
<u>Chapter V : Convergence of generalized martingales in Banach spaces - the mean way</u>	120
V.1. Uniform amarts	122
V.2. Amarts	133
V.3. Weak sequential amarts	157
V.4. Weak amarts	182
V.5. Semiamarts	189
V.6. Notes and remarks	205
<u>Chapter VI : General directed index sets and applications of smart theory</u>	212
VI.1. Convergence of adapted nets	212
VI.2. Applications of smart convergence results	217
VI.3. Notes and remarks	230
<u>Chapter VII : Disadvantages of amarts. Convergence of generalized martingales in Banach spaces - the pointwise way</u>	234
VII.1. Disadvantages of amarts	235
VII.2. Pramarts, mils, GFT	246
VII.3. Notes and remarks	271

<u>Chapter VIII : Convergence of generalized sub- and super-</u> <u>martingales in Banach lattices</u>	280
VIII.1. Subpramarts, superpramarts and related notions	280
VIII.2. Applications to pramartconvergence	312
VIII.3. Notes and remarks	316
<u>Chapter IX : Closing remarks</u>	320
IX.1. A general remark concerning scalar convergence	320
IX.2. Summary of the most important convergence results	322
IX.3. Convergence of adapted sequences of Pettis integrable functions	328
References	333
List of notations	344
Subject index	346
