

CONTENTS

	PREFACE	ix
1	INTRODUCTION	1
	What is the value of statistics?	3
	Brief introduction to the history of statistics	5
	General statistical definitions	5
	Types of variables	7
	Scales of measurement	8
	Summary	12
2	DATA REPRESENTATION	16
	Tabular display of distributions	18
	Graphical display of distributions	23
	Percentiles	29
	SPSS	33
	Summary	34
3	UNIVARIATE POPULATION PARAMETERS AND SAMPLE STATISTICS	39
	Summation notation	40
	Measures of central tendency	41
	Measures of dispersion	45
	SPSS	53
	Summary	55

4	THE NORMAL DISTRIBUTION AND STANDARD SCORES	59
	The normal distribution	60
	Standard scores	65
	Skewness and kurtosis statistics	68
	SPSS	72
	Summary	73
5	INTRODUCTION TO PROBABILITY AND SAMPLE STATISTICS	77
	Brief introduction to probability	78
	Sampling and estimation	81
	Summary	87
6	INTRODUCTION TO HYPOTHESIS TESTING: INFERENCES ABOUT A SINGLE MEAN	92
	Types of hypotheses	93
	Types of decision errors	95
	Level of significance (α)	98
	Overview of steps in the decision-making process	100
	Inferences about μ when σ is known	101
	Type II error (β) and power ($1 - \beta$)	105
	Statistical versus practical significance	108
	Inferences about μ when σ is unknown	109
	SPSS	113
	Summary	114
7	INFERENCES ABOUT THE DIFFERENCE BETWEEN TWO MEANS	119
	New concepts	120
	Inferences about two independent means	122
	Inferences about two dependent means	129
	SPSS	133
	Summary	134
8	INFERENCES ABOUT PROPORTIONS	140
	Inferences about proportions involving the normal distribution	141
	Inferences about proportions involving the chi-square distribution	151
	SPSS	156
	Summary	158
9	INFERENCES ABOUT VARIANCES	162
	New concepts	163
	Inferences about a single variance	164
	Inferences about two dependent variances	166
	Inferences about two or more independent variances (homogeneity of variance tests)	168
	SPSS	172
	Summary	173

10	BIVARIATE MEASURES OF ASSOCIATION	176
	Scatterplot	177
	Covariance	179
	Pearson product-moment correlation coefficient	182
	Inferences about the Pearson product-moment correlation coefficient	183
	Some issues regarding correlations	186
	Other measures of association	188
	SPSS	191
	Summary	192
11	ONE-FACTOR ANALYSIS OF VARIANCE—FIXED-EFFECTS MODEL	196
	Characteristics of the one-factor ANOVA model	198
	The layout of the data	200
	ANOVA theory	201
	The ANOVA model	206
	Assumptions and violation of assumptions	210
	The unequal n 's or unbalanced design	213
	Alternative ANOVA procedures	213
	SPSS	215
	Summary	217
12	MULTIPLE COMPARISON PROCEDURES	222
	Concepts of multiple comparison procedures	224
	Selected multiple comparison procedures	228
	SPSS	241
	Summary	242
13	FACTORIAL ANALYSIS OF VARIANCE—FIXED-EFFECTS MODEL	247
	The two-factor ANOVA model	249
	Three-factor and higher-order ANOVA	265
	Factorial ANOVA with unequal n 's	267
	SPSS	268
	Summary	269
14	INTRODUCTION TO ANALYSIS OF COVARIANCE: THE ONE-FACTOR FIXED-EFFECTS MODEL WITH A SINGLE COVARIATE	277
	Characteristics of the model	278
	The layout of the data	281
	The ANCOVA model	281
	The ANCOVA summary table	282
	Partitioning the sums of squares	283
	Adjusted means and related procedures	283
	Assumptions and violation of assumptions	286

	An example	289
	ANCOVA without randomization	292
	More complex ANCOVA models	293
	Nonparametric ANCOVA procedures	293
	SPSS	293
	Summary	294
15	RANDOM- AND MIXED-EFFECTS ANALYSIS OF VARIANCE MODELS	301
	The one-factor random-effects model	303
	The two-factor random-effects model	306
	The two-factor mixed-effects model	309
	The one-factor repeated measures design	313
	The two-factor split-plot or mixed design	319
	SPSS	325
	Summary	331
16	HIERARCHICAL AND RANDOMIZED BLOCK ANALYSIS OF VARIANCE MODELS	335
	The two-factor hierarchical model	336
	The two-factor randomized block design for $n = 1$	343
	The two-factor randomized block design for $n > 1$	350
	The Friedman test	350
	Comparison of various ANOVA models	351
	SPSS	353
	Summary	357
17	SIMPLE LINEAR REGRESSION	361
	The concepts of simple linear regression	362
	The population simple linear regression model	364
	The sample simple linear regression model	365
	SPSS	381
	Summary	383
18	MULTIPLE REGRESSION	387
	Partial and semipartial correlations	388
	Multiple linear regression	390
	Other regression models	403
	SPSS	408
	What's next?	408
	Summary	410
