

Preface to the Second Edition	xi
Preface to the First Edition	xiii
1 Probability Concepts	1
<i>1-1</i> Introduction	1
<i>1-2</i> Concept of Probability	2
<i>1-3</i> Relative Frequency	5
<i>1-4</i> Laws of Probability	8
<i>1-5</i> Fundamental Theorems	9
<i>1-6</i> General Comments	14
<i>1-7</i> Illustrations of General Principles	15
<i>1-8</i> Bayes' Theorem	23
<i>1-9</i> Geometrical Probability	27
Appendix to Chapter 1	32
<i>1-10</i> Permutations and Combinations	32
Problems	35

2	Discrete Random Variables	39
2-1	Introduction	39
2-2	Distributions	40
2-3	Distribution Functions	41
2-4	Probability Functions	43
2-5	Random Sampling	45
2-6	Specific Discrete Distributions	46
2-7	The Binomial Distribution	46
2-8	The Multinomial Distribution	53
2-9	The Hypergeometric Distribution	55
2-10	The Geometric and Pascal Distribution	60
2-11	The Poisson Distribution	61
	Problems	71
3	Probability and Difference Equations	74
3-1	Difference Equations	74
3-2	Probability Generating Functions	79
3-3	Simultaneous Difference Equations	82
3-4	Applications	87
3-5	Random Walks	87
3-6	Generalized Binomial Distribution	89
3-7	Sequence of Successes	91
	Problems	93
4	Continuous Random Variables	96
4-1	Distribution Functions	96
4-2	Use of Distribution Functions in Defining Distributions	97
4-3	Computation of Probabilities	101
4-4	Density Functions	101
4-5	Properties of Density Functions	103
4-6	Examples of Density Functions	103
4-7	Use of Density Functions in Defining Distributions	105
4-8	Exceptional Situations	105
4-9	The Gamma Distribution	108
4-10	The Beta Distribution	123
4-11	The Normal Distribution	127
4-12	Confidence Limits (Interval Estimation)	136
	Appendix to Chapter 4	139

4-13	Gamma Functions	139
4-14	Beta Functions	142
	Problems	145
5	Joint Distributions	149
5-1	Fundamental Concepts	149
5-2	Multivariate-distribution Functions and Density Functions	154
5-3	Admissible Regions	156
5-4	Continuous Bivariate Distributions	158
5-5	Illustrations of the Use of General Principles	165
5-6	Point Estimation of a Parameter	178
5-7	Bayesian Approach to Estimation	180
5-8	Search Theory and Distribution of Effort	187
	Problems	192
6	Derived Distributions	198
6-1	Introduction	198
6-2	Monotonic Functions	199
6-3	The Density Function of a Monotonically Increasing Function	199
6-4	The Density Function of a Monotonically Decreasing Function	203
6-5	The Probability Transformation	205
6-6	Density Functions of the Square and the Absolute Value	206
6-7	The Distribution of a Function of Two or More Independent Variates	207
6-8	Some Derived Distributions Used in Statistics	216
6-9	The Chi-square Distribution	217
6-10	The t Distribution	218
6-11	The F Distribution	219
6-12	The Distribution of a Function of Nonindependent Variates	220
6-13	Joint Distribution of Multivariate Functions	224
6-14	Significance Tests	236
6-15	The Hypergeometric Test for the Difference between Two Percentages	246
6-16	Collective Significance	250
	Problems	254
7	Mathematical Expectation	260
7-1	Definition	260
7-2	Averages	262

7-3	Some Additional Properties of the Mean	267
7-4	Variance	268
7-5	Unbiased Estimation of Variance	273
7-6	Probability of Extreme Values	276
7-7	Multivariate Functions	278
7-8	Covariance and Correlation	281
7-9	The Variance of a Linear Function	282
7-10	Applications of Expected-value Theory	283
	Problems	302
8	Generating Functions	309
8-1	Moments	309
8-2	Characterization of a Distribution Function	310
8-3	Characteristic Functions	313
8-4	Moment-generating Functions	316
8-5	Multivariate Moment-generating Functions	326
8-6	Asymptotic Distributions	329
	Problems	336
9	Markov Processes and Waiting Lines	339
9-1	Definition	339
9-2	Mathematical Properties	340
9-3	Difference Equations	342
9-4	Ergodic Process	346
9-5	Markov Processes and Rewards	353
9-6	Strategies and Markov Processes	357
9-7	Continuous Markov Processes	360
9-8	Illustrations of Continuous Markov Processes	366
	Appendix to Chapter 9	374
9-9	Convergence of the Maximization Program	374
	Problems	375
10	Some Statistical Uses of Probability	379
10-1	Introduction	379
10-2	The Normal Tests	380
10-3	The Normal Test for the Difference between Two Percentages	380
10-4	The Normal Test for Association or Independence	385

<i>10-5</i>	The Chi-square Tests	387
<i>10-6</i>	The Chi-square Test for Goodness of Fit	388
<i>10-7</i>	The Chi-square Test for Homogeneity	392
<i>10-8</i>	The Chi-square Test for Association or Independence	395
<i>10-9</i>	The Distributions of \bar{x} and s^2 in a Normal Population	400
<i>10-10</i>	The t Tests	403
<i>10-11</i>	The t Test for a Single Mean	404
<i>10-12</i>	The t Test for the Means of Paired Observations	406
<i>10-13</i>	The t Test for the Difference of the Means of Two Independent Samples	408
<i>10-14</i>	Respective Confidence Limits for μ and σ^2	412
<i>10-15</i>	The F Tests	415
<i>10-16</i>	Tests for Equality of Variances	416
<i>10-17</i>	The F Test for Equality of More Than Two Means	421
	Problems	426
	Index	443
