

CONTENTS

PREFACE	vii
LIST OF SYMBOLS	ix

Chapter I Lifetime of a Component

1 Introduction	1
2 Age and Lifetime of a Component	2
3 Survival Function	6
4 Failure Probability, Failure Rate	9
5 Moments of a Survival Law, Mean Failure Age	13
6 Principal Survival Laws Used in the Management of Equipment	16
7 Survival Law of Nonnew Equipment	28
8 Survival Law with Guarantee, Survival Law with a Limit on Functioning	29

Chapter II Equipment with an Increasing Failure Rate

9 Introduction	33
10 Survival Functions with Increasing (Decreasing) Failure Rate	34
11 Properties of IFR Functions	40
12 Survival Functions with Increasing Failure Rate Averages	46

Chapter III Study of the Structure of Systems: Structure Functions and Reliability Networks

13 Introduction	55
14 Hypotheses on the Structure and Functioning of Systems	56
15 Structure Function	56
16 Links and Cuts	61
17 Mathematical Properties of Links and Cuts, Duality	65

18	Review of the Theory of Graphs	68
19	Reliability Networks	71
20	Equivalence between Structure Functions and Reliability Networks	80
21	Monotone (or Coherent) Structures	83
22	Construction and Simplification of Structure Functions and of Reliability Networks	92
23	Finding Links and Cuts	99

Chapter IV Study of the Reliability of Systems

24	Introduction. Definitions and Hypotheses	114
25	The Reliability Function	116
26	Composition of Structures	123
27	Representative Curves of Reliability Functions for Monotone Structures. Theorem of Moore and Shannon	135
28	Systems Monotone in Probability	140
29	Survival Function of a System	146
30	Survival Functions for Series and Parallel Structures. Asymptotic Results for a Large Number of Components	159

Chapter V Redundance

31	Introduction. Definitions	167
32	Active Redundance at the Level of Substructures or at the Level of Components	169
33	Optimal Redundance	172
34	Concavity of Monotone Structures with Respect to Redundance	180
35	Type k of n Structures	183

Chapter VI Systems Presenting Two Dual Types of Failures

36	Introduction	190
37	Definition. Properties	192
38	Reliability Function of a System Presenting Two Types of Failures	194
39	Redundance in Systems with Components of the Same Reliabilities	198
40	Iterative Structures	203

Appendix Pólya Functions of Order 2. Totally Positive Functions of Order 2

A.1	Pólya Functions of Order 2	207
A.2	Totally Positive Functions of Order 2	212
A.3	Relation to IFR Functions	213

Bibliography	215
