

TABLE OF CONTENTS

1. BROWNIAN MOTION

| | |
|---|----|
| 1. Introduction | 1 |
| 2. Foundations | 11 |
| 3. Strong Markov and reflection | 21 |
| 4. Sample function properties | 35 |
| 5. Strassen's law of the iterated logarithm | 49 |
| 6. The Skorokhod representation | 68 |
| 7. Donsker's invariance principle | 76 |
| 8. Strassen's invariance principle | 85 |
| 9. Lindeberg's theorem for martingales | 89 |
| 10. Central limit theorem for random sums | 94 |
| 11. Wald's identity | 98 |

2. DIFFUSION

| | |
|----------------------------|-----|
| 1. Introduction | 102 |
| 2. Regularity | 106 |
| 3. Scale | 113 |
| 4. Semigroups | 117 |
| 5. Green's function | 122 |
| 6. Speed measure | 126 |
| 7. Infinitesimal generator | 131 |
| 8. Brownian local time | 138 |
| 9. Transformation of time | 151 |

| | |
|--|-----|
| 10. Diffusion local time | 159 |
| 11. First examples | 161 |
| 12. An example of Feller and McKean | 163 |
| 13. An example of Breiman | 165 |
| 14. A generalization | 172 |
| 15. Weak Markov processes | 174 |
| 3. APPENDIX | |
| 1. Notation | 180 |
| 2. Numbering | 181 |
| 3. Bibliography | 181 |
| 4. The abstract Lebesgue integral | 182 |
| 5. Atoms | 185 |
| 6. Independence | 188 |
| 7. Conditioning | 189 |
| 8. Martingales | 190 |
| 9. Metric spaces | 197 |
| 10. Regular conditional distributions | 198 |
| 11. The Kolmogorov consistency theorem | 204 |
| 12. The diagonal argument | 205 |
| 13. Classical Lebesgue measure | 207 |
| 14. Real variables | 208 |
| 15. Absolute continuity | 211 |
| 16. Convex functions | 212 |
| 17. Complex variables | 216 |
| BIBLIOGRAPHY | 218 |
| INDEX | 224 |
| SYMBOL FINDER | 229 |
