List of Figures and Tables	ix
Preface	xi
Acknowledgments	xvii
Chapter 1. Introduction	1
1. Introduction	1
2. Queueing Networks	2
3. An Important Special Case	3
4. Three Examples of Traffic Properties	6
4.1. <i>Burke's Output Traffic Problem</i>	6
4.2. <i>Palm's Overflow Traffic Problem</i>	7
4.3. <i>Traffic in the Queue with Instantaneous Bernoulli Feedback</i>	8
5. Point Processes and Queueing Networks	10
5.1. <i>Point Processes</i>	11
5.2. <i>Marked Point Processes</i>	12
6. Probability Structures	12
6.1. <i>Point Process Structures</i>	13
6.2. <i>Marked Point Process Structures</i>	15
Chapter 2. Background	19
1. Introduction	19
2. Markov Renewal Process Structure	20
3. m-Step Transition Functions	22
4. Markov Renewal Kernel	25
5. The Classification of States	27
6. Markov Renewal Equations	29
7. Limit Theorems	32
8. Semi-Markov Processes	33
9. Markov Chains, Markov Renewal Processes, and Stationarity	34
10. Examples	36
11. Equivalence	46
12. Lumpability	53
13. Reversibility and Dynamic Reversibility	55
13.1. <i>Reversing Markov Chains</i>	56

13.2. Reversing Markov Processes	57	
13.3. Dynamically Reversible Markov Processes	57	57
13.4. Reversing Markov Renewal Processes	57	
14. Bibliographic Notes	59	
Chapter 3. Examples of Traffic Processes		60
1. Introduction	60	
2. A Simulation Analysis of Simple Networks	61	
2.1. A Three-Node Cyclic Closed Network	62	
2.2. Delayed Feedback—Closed Network	63	
2.3. Delayed Feedback—Open Network	63	
2.4. Positive Autocorrelations in Closed Networks	65	65
3. Outputs from the $M/M/1$ Queue	67	
4. The $M/M/1$ Overflow Queue with $L = 0$	70	
5. Output from the $M/M/1/L$ Queue	76	
6. A Queue with Delayed Feedback	79	
7. Crosscorrelations in Traffic Processes in the Overflow Queue	81	
8. Bibliographic Notes	85	
Chapter 4. Traffic Processes in Markov Networks		86
1. Introduction	86	
2. Preliminaries	87	
3. The Embedded Markov Renewal Process	89	
4. Open Jackson Networks	95	
5. The Reversibility of Jackson Networks	97	
6. Traffic in Reversible Jackson Networks	97	
7. Jackson Networks with Instantaneous Feedback	100	100
8. Closed Jackson Networks	103	
9. Traffic in Closed Jackson Networks	105	
10. Symmetric Queueing Networks	109	
11. Extensions to Networks Where the State Process Is Not Dynamically Reversible	114	
12. Some Implications	118	
12.1. The Reversibility of Queue Length Processes and Traffic Processes	118	
12.2. The Reversibility of Point Processes	119	
12.3. Reversibility and Operations on Random Processes	119	119
12.4. Reversible Traffic Processes in Nonreversible Networks	120	
12.5. Implications	121	
13. Special Cases	122	
14. Bibliographic Notes	123	
14.1. State Processes	123	

14.2. Traffic Processes in Queueing Networks	124	
Chapter 5. The Decomposition of Traffic Processes		126
1. Introduction	126	
2. Overflow Queueing Networks	127	
3. Semi-Markov Switches	132	
4. The Classification of States	133	
5. A Special Case	136	
6. The c th Output Process	141	
7. Examples	149	
7.1. Decomposing a Compound Poisson Process	149	
7.2. Decomposing a Markov Jump Process Whose Jumps Are Independent of the Point Process	151	
8. A Generalization for Traffic Processes	153	
9. Two Approaches Compared	159	
10. An Example	160	
11. Bibliographic Notes	166	
Chapter 6. Output Processes		167
1. Introduction	167	
2. Outputs from Birth-Death Queues	167	
3. Outputs from $M/GI/1/L \leq \infty$ Queues	171	
4. Second-Order Statistical Properties of $M/GI/1/L \leq \infty$ Output Processes—Covariances, Lag 1	177	
5. The $M/M/1$ Queue with Instantaneous Bernoulli Feedback	182	
5.1. The Arrival Process	185	
5.2. The Output Process	186	
5.3. The Input Process	188	
5.4. The Feedback Process	188	
5.5. Comparisons	189	
6. The Queue with Delayed Feedback	190	
7. General Delay	196	
8. Bibliographic Notes	198	
Chapter 7. Decomposing Point and Marked Point Processes: Crosscovariance and Crosscorrelation Analysis		200
1. Introduction	200	
2. Crosscorrelation and Crosscovariance	201	
2.1. Decomposing a Point Process	201	
2.2. Decomposing a Marked Point Process	202	
3. Crosscovariance: A Point Process Decomposed by a Bernoulli Process	203	
4. Decomposing Stationary Renewal Processes	205	
5. Decomposing Synchronous Renewal Processes	207	

6. Interval-Count Relations	209	
7. State-Dependent Decomposing of a Markov Renewal Process		211
8. Two Examples	214	
9. Variances of $N^A(t)$, and $N^B(t)$	217	
10. Bernoulli Decomposing of Alternating Markov Processes		219
11. Markov Chain Decomposing of Renewal Processes	221	
12. Bibliographic Notes	223	
Appendix. Point Processes and Reversibility		224
1. Introduction	224	
2. Point Processes	225	
3. Marked Point Processes	228	
4. Stationarity	229	
5. Palm Distributions	229	
6. Markov Renewal Processes	231	
7. Reversing Random Marked Point Processes	232	
8. Dynamic Reversibility and Dynamically Reversed Processes	237	
9. Bibliographic Notes	240
