

# Table of Contents

Chapter 0. Preliminaries .....	1
§ 1. Basic Notation .....	1
§ 2. Monotone Class Theorem .....	2
§ 3. Completion .....	3
§ 4. Functions of Finite Variation and Stieltjes Integrals .....	4
§ 5. Weak Convergence in Metric Spaces .....	9
§ 6. Gaussian and Other Random Variables .....	12
 Chapter I. Introduction .....	 14
§ 1. Examples of Stochastic Processes. Brownian Motion .....	14
§ 2. Local Properties of Brownian Paths .....	24
§ 3. Canonical Processes and Gaussian Processes .....	31
§ 4. Filtrations and Stopping Times .....	39
Notes and Comments .....	46
 Chapter II. Martingales .....	 48
§ 1. Definitions, Maximal Inequalities and Applications .....	48
§ 2. Convergence and Regularization Theorems .....	57
§ 3. Optional Stopping Theorem .....	64
Notes and Comments .....	73
 Chapter III. Markov Processes .....	 74
§ 1. Basic Definitions .....	74
§ 2. Feller Processes .....	83
§ 3. Strong Markov Property .....	97
§ 4. Summary of Results on Lévy Processes .....	109
Notes and Comments .....	112
 Chapter IV. Stochastic Integration .....	 113
§ 1. Quadratic Variations .....	113
§ 2. Stochastic Integrals .....	129
§ 3. Itô's Formula and First Applications .....	137
§ 4. Burkholder-Davis-Gundy Inequalities .....	151

§ 5. Predictable Processes .....	161
Notes and Comments .....	166
<b>Chapter V. Representation of Martingales .....</b>	<b>168</b>
§ 1. Continuous Martingales as Time-changed Brownian Motions .....	168
§ 2. Conformal Martingales and Planar Brownian Motion .....	177
§ 3. Brownian Martingales .....	186
§ 4. Integral Representations .....	195
Notes and Comments .....	202
<b>Chapter VI. Local Times .....</b>	<b>206</b>
§ 1. Definition and First Properties .....	206
§ 2. The Local Time of Brownian Motion .....	221
§ 3. The Three-Dimensional Bessel Process .....	232
§ 4. First Order Calculus .....	241
§ 5. The Skorokhod Stopping Problem .....	249
Notes and Comments .....	256
<b>Chapter VII. Generators and Time Reversal .....</b>	<b>259</b>
§ 1. Infinitesimal Generators .....	259
§ 2. Diffusions and Itô Processes .....	271
§ 3. Linear Continuous Markov Processes .....	278
§ 4. Time Reversal and Applications .....	290
Notes and Comments .....	299
<b>Chapter VIII. Girsanov's Theorem and First Applications .....</b>	<b>301</b>
§ 1. Girsanov's Theorem .....	301
§ 2. Application of Girsanov's Theorem to the Study of Wiener's Space ..	313
§ 3. Functionals and Transformations of Diffusion Processes .....	324
Notes and Comments .....	335
<b>Chapter IX. Stochastic Differential Equations .....</b>	<b>338</b>
§ 1. Formal Definitions and Uniqueness .....	338
§ 2. Existence and Uniqueness in the Case of Lipschitz Coefficients .....	348
§ 3. The Case of Hölder Coefficients in Dimension One .....	358
Notes and Comments .....	369
<b>Chapter X. Additive Functionals of Brownian Motion .....</b>	<b>371</b>
§ 1. General Definitions .....	371
§ 2. Representation Theorem for Additive Functionals of Linear Brownian Motion .....	379
§ 3. Ergodic Theorems for Additive Functionals .....	392
§ 4. Asymptotic Results for the Planar Brownian Motion .....	400
Notes and Comments .....	406

Chapter XI. Bessel Processes and Ray-Knight Theorems .....	409
§ 1. Bessel Processes .....	409
§ 2. Ray-Knight Theorems .....	420
§ 3. Bessel Bridges .....	428
Notes and Comments .....	434
 Chapter XII. Excursions .....	 435
§ 1. Prerequisites on Poisson Point Processes .....	435
§ 2. The Excursion Process of Brownian Motion .....	442
§ 3. Excursions Straddling a Given Time .....	450
§ 4. Descriptions of Itô's Measure and Applications .....	455
Notes and Comments .....	470
 Chapter XIII. Limit Theorems in Distribution .....	 472
§ 1. Convergence in Distribution .....	472
§ 2. Asymptotic Behavior of Additive Functionals of Brownian Motion .....	478
§ 3. Asymptotic Properties of Planar Brownian Motion .....	487
Notes and Comments .....	497
 Appendix .....	 499
§ 1. Gronwall's Lemma .....	499
§ 2. Distributions .....	499
§ 3. Convex Functions .....	500
§ 4. Hausdorff Measures and Dimension .....	503
§ 5. Ergodic Theory .....	504
 Bibliography .....	 505
Index of Notation .....	527
Index of Terms .....	530
