

1	Discrete-Parameter Controlled Stochastic Processes	1
1	Definitions	1
2	Optimization Problem	8
3	Construction of Optimal and ε -Optimal Controls	16
4	Control of Processes with Incomplete Observations	36
5	Optimal Stopping Problems	42
6	Controlled Markov Chains	50
7	Homogeneous Controlled Markov Chains	61
8	Optimal Stopping of Markov Chains	70
2	Continuous-Time Control Processes	79
1	General Definitions	79
2	Representation of the Controlled Objects and Construction of Controlled Processes	85
3	Optimization Problem; Approximation Theorem	105
4	Controlled Markov Processes	107
5	Jump Markovian Controlled Processes	
3	Controlled Stochastic Differential Equations	116
1	Some Preliminaries	116
2	Stochastic Differential Equations	126
3	Controlled Stochastic Differential Equations	153
4	Evolutional Loss Functions	170
5	Linear Systems without an After-effect	187
6	Control Equations with Continuous Noise	200
7	Controlled Diffusion Processes	216
	Bibliography	227
	Historical and Bibliographical Remarks	231
	Index	235
