CONTENTS

FOREWORD		ix
CONTENTS OF VOLUME A		xv
INTRODUCTION		xvii

PART VI

Process-Type Cases and Data Control

Chapter XXI.	**Computer Usage in the Process Industry**	1
	Transitional Path in Computer Applications	2
	Evolution toward Process-Type Studies	5
	Integrated Applications in the Refinery	7
	Systems Concept in Data Control	13
Chapter XXII.	**Applications with Technical Problems**	17
	Computer Use in Chemical and Petroleum Engineering	18
	Studying Pipeline Problems	22
	Simulation Problems	26
	"Feedforward" Concepts	30
Chapter XXIII.	**The Rationalization of Management Data**	32
	Developing an Integrated Information System	33
	Computational Requirements in Dispatching	40
	Using Applied Mathematics	41
	Example with Gas Dispatching	44
Chapter XXIV.	**Applications in The Field of Accounting**	47
	Computerizing Oil and Gas Data	49
	General Accounting-Type Applications	53
	Approaching the Credit Card Problem	58
	Accounting Control through Sampling	60

Chapter XXV. **Controlling a Power Production Plant** 64
Input and Throughput Action for Power Plants 65
A Process Control System for Boiler Operations 70
Operational Characteristics and Logging 75
Case Study on Data Collection in Boiler Testing 78

PART VII
Applications in the Metals Industry

Chapter XXVI. **Computer Usage in the Steel Industry** 85
Applications Review in Steel Works 86
Systems Study in a Steel Process 91
Mathematical Simulation in Steel Works 96

Chapter XXVII. **Evaluating the Data Load** 102
Advantages to Be Gained from Digital Automation 103
Data Load Equilibrium through Batching 109
Example from a Process-Type Application 114

Chapter XXVIII. **Production and Inventory Control at the Forge Metal Works** 119
East, Central, and West Divisions 121
Tube and Specialty Divisions 125

Chapter XXIX. **Quality Assurance as a Real-Time Application** 138
Quality Effects of Mass Production 139
Using Product Assurance Indicators 144
Case Study in a Tin Plate Plant 151

PART VIII
Guidance for Discrete Particles

Chapter XXX. **Airline Reservations Systems** 159
Evaluating Systems Requirements 160
The Basic System's Service 163
Some Operating Characteristics 169
Associated Systems Service 174

Chapter XXXI. **Guidance Approaches to Air Traffic** 177
Simulation for Air-Traffic Control 179
Real-Time Air-Traffic Control 183
Weather Data Collection 187
Using Weather Data for Predictive Purposes 192

Chapter XXXII. **Aircraft Detection and In-Flight Tracking** 197
Aircraft Detection Systems 197
An Early Experiment in Data Automation Techniques 201
Computer Role in Satellite and Missile Tracking 205
A Satellite Tracking Network 209

Chapter XXXIII. **Railroad, Subway, and Car Traffic Problems** 213
Toward Railroad Automation 214
Planning and Controlling the Rolling Stock 217
Reservation Systems for Railroads 221
Developments in Subways 224
Motor Traffic Control 225

Chapter XXXIV. **Digital Automation in Banking** 230
Looking Ten Years Ahead 230
Problem Definition at the Bloomington Savings Bank 234
Automating Basic Bank Operations 239
Questions of Obsolescence 246

INDEX 249
