

Contents

Publications of M. S. Bartlett	1
Part I — Historical Introduction	
W. G. COCHRAN	
Bartlett's work on agricultural experiments	9
Part II — Probability Theory	
TOBY LEWIS	
Probability functions which are proportional to characteristic functions and the infinite divisibility of the von Mises distribution	19
LAJOS TAKÁCS	
On a problem of fluctuations of sums of independent random variables	29
Part III — Statistical Theory	
G. A. BARNARD	
On the geometry of estimation	41
D. R. COX	
Prediction intervals and empirical Bayes confidence intervals	47
A. M. KSHIRSAGAR	
Direction and dimensionality tests based on Hotelling's generalized T^2	57
PAUL MEIER	
Estimation of a distribution function from incomplete observations	67
C. RADHAKRISHNA RAO	
On a unified theory of estimation in linear models—a review of recent results	89
E. J. WILLIAMS	
The power of some tests of correlation	105
HERMAN WOLD	
Soft modelling by latent variables: the non-linear iterative partial least squares (NIPALS) approach	117
Part IV — Mathematical Methods in Probability and Statistics	
J. W. COHEN	
The Wiener-Hopf technique in applied probability	145
C. A. B. SMITH	
Iteration near a fixed point	157
Part V — Stochastic Processes	
A. BLANC-LAPIERRE	
Fonctions certaines admettant des répartitions asymptotiques et fonctions aléatoires stationnaires	177

HARALD CRAMÉR	
On the multiplicity of a stochastic vector process	187
J. M. HAMMERSLEY	
Rumination on infinite Markov systems	195
J. F. C. KINGMAN	
Anticipation processes	201
P. WHITTLE	
Reversibility and acyclicity	217

Part VI — Statistical Inference on Stochastic Processes

E. J. HANNAN	
Measuring the velocity of a signal	227
D. VERE-JONES	
On updating algorithms and inference for stochastic point processes.....	239

Part VII — Probability Models in the Physical Sciences

VIOLET R. CANE	
Diffusion models with relativity effects.....	263
ULF GREANDER	
Restoration of deformed lattice patterns.....	275
P. A. P. MORAN	
Quaternions, Haar measure and the estimation of a palaeomagnetic rotation ...	295
HERBERT SOLOMON	
A highway traffic model	303

Part VIII — Probability Models in the Humanities

J. GANI	
Stochastic models for type counts in a literary text	313
DAVID G. KENDALL	
Some problems in mathematical genealogy.....	325

Part IX — Biomathematics and Epidemiology

P. ARMITAGE	
The use of the cross-ratio in aetiological surveys	349
NORMAN T. J. BAILEY	
Approaches to the control of infectious disease	375
H. E. DANIELS	
The deterministic spread of a simple epidemic	373
P. D. M. MACDONALD	
The distribution of DNA in exponentially-growing cell populations.....	387
P. TAUTU	
A stochastic automaton model for interacting systems	403
List of Contributors.....	417
Index.....	419
