<b>Preface</b>	<i>page</i> vii
<b>Section 1</b>	1
Students <i>t</i> -distribution	1–12
<i>Use of <i>t</i>-tables [1], confidence intervals using <i>t</i> [6],         testing hypotheses using <i>t</i> [11], single sample problems [11]         two sample problems [16]</i>	
Summary	13
<b>Exercises for Section 1</b>	15
Physical sciences and engineering	15
Biological sciences	15
Social sciences	16
Goodness of fit	17–22
Summary	22
Contingency tables	23–31
<i>Expected frequency [6], <math>r \times c</math> contingency table [13],         steps in application [16]</i>	
Summary	31

<b>Exercises for Section 2</b>	33
Physical sciences and engineering	33
Biological sciences	34
Social sciences	35
<b>Solutions to Exercises, Section 1</b>	36
Physical sciences and engineering	36
Biological sciences	38
Social sciences	39
<b>Solutions to Exercises, Section 2</b>	42
Physical sciences and engineering	42
Biological sciences	45
Social sciences	47
<b>Tables</b>	50
Squares and square roots	50
Students <i>t</i> -distribution	51
Reciprocals	52
$\chi^2$ distribution	53
