PREFACE 3
CONTENTS 5
SCIENTIFIC PROGRAM 11
LIST OF PARTICIPANTS 25
P. Adler – Z. Szabó, The suitability of different mathematical models in describing cumulative caries prevalence curves of individual teeth 43
R. Ahmad, On the multivariate k-sample problem and the generalization of the Kolmogorov – Smirnov-test 51
R. V. Ambarcumjan, Solution to the Buffon – Sylvester problem ... 61
C. Andrieu – Bùi-Trọng-Liêu – C. Langrand, Selection and estimation for Markov processes of continuous time 65
M. Arató – A. Benczúr, Some new results in the statistical investigation of elementary process 69
P. Bártfai, On a conditional limit theorem 85
I.I. Berenblut – G.I. Webb, First order designs in the presence of a time trend 93
H. Bergström, On the central limit theorem in R^k – A correction and a conjecture – 97
J.E. Besag, On the statistical analysis of nearest-neighbour systems 101
J. Bibby, Minimum mean square error estimation, ridge regression, and some unanswered questions 107
F. Burkhardt – L. Osadnik, Applications of renewal theory 123
T. Cacoullos – Ch. Charalambides, M.V.U.E. for truncated discrete distributions 133
C.L. Chiang, An equality in stochastic processes and its applications 145
P. Clifford – A. Sudbury, Cell-size-dependent branching processes 153

D.R. Cox – A.M. Herzberg, A statistical problem posed by E.A. Milne 157
M. Csörgő, On the problem of replacing composite hypotheses by equivalent simple ones (A characterization approach to goodness-of-fit) 159
H. Drygas, A note on Gauss – Markov estimation in multivariate linear models 181
G. Enderlein, Multiple comparisons of means with the total mean 191
J. Fritz, Some remarks on a paper of J. MacQueen on cluster analysis 199
P. Gänssler, Some new methods in parameter estimation for stochastic processes 209
M. Girault, Statistical methodology – New perspectives of contributions to human sciences – ... 227
J.C. Gittins – D.M. Jones, A dynamic allocation index for the sequential design of experiments 241
J. Gordesch, Causal models 267
B. Gyires, A question about the randomized blocks 277
L. Győrfi, Estimation of probability density and optimal decision function in RKHS 289
N. Hadidi, Linearly state dependent queues 303
G. Härtler, Experience with factorial experiments in reliability-of-component problems 309
K. Hinderer – H. Walk, A generalization of renewal processes 315
P. Holgate, A note on random power series with identical one dimensional marginal distribution 319
V. Horálek, On nonhomogeneous birth-immigration-death processes 323
M. Iosifescu, On the application of random systems with complete connections to the theory of f-expansions 335
M. Jílek, Note on a branching process (Contribution to a theory of the immune response) 365
J. Jurečková, An asymptotic theorem of nonparametrics 373

D.G. Kendall, Data-analytic problems in archaeology and history ... 381
J.F.C. Kingman, Regeneration 389
H.S. Konijn, Confidence intervals for ratio estimators 407
K. Kovacsics, Construction of tables of criminality by rectification of criminality probabilities 413
I. Kramosil, A statistical model for theorem proving with a limited instantaneous memory 425

Volume II

CONTENTS 457
R.G. Laha – E. Lukacs, On some problems connected with the characterization of distributions by constant regression..... 461
D.V. Lindley, A Bayesian solution for two-way analysis of variance 475
J. Loris-Teghem, An algebraic approach to the waiting time process in GI/M/S 497
P. Mandl, On the asymptotic normality of the reward in a controlled Markov chain 499
M. Metivier, Stochastic integral and vector valued measures 507
V. Miké, Robust estimation of location: A Monte Carlo study ... 523
M.A. Mirzahmedov – S.A. Hasimov, On some properties of density estimation 535
S.G. Mohanty – S. Vellore, On some distributions of a generalized restricted random walk 547
E. Mohn – I. Holme – R. Volden, On stepwise regression in orthogonal models 557
V.V. Nalimov, Systematization and codification of the experimental designs –
The survey of the works of soviet statisticians 565
D. Oakes, A k-fold quasi-Poisson process 583
A. Obretenov, An estimation for the renewal function of an IFR-distribution 587

F. Österreicher, An information-type measure of difference of probability distributions based on testing statistical hypotheses 593
W.R. Pabst, Statistical studies of the costs of six-man versus twelve-man juries 601
V. Paulauskas, On sums of a random number of random multi-dimensional vectors 615
A. Perez, Generalization of Chernoff's result on the asymptotic discernibility of two random processes 619
J. Pergel, On the statistical examination of Poisson processes with randomly changing intensity 633
V.V. Poznjakov, Approximate formulas for probability of non-crossing of level by stationary process 637
J. Radcliffe, The convergence of an age-dependent branching process allowing immigration 641
T. Rolski, Some inequalities in queuing theory 653
M. Ruda – L. Szeidl – G. Tusnády, Time series analysis on CDC 3300 661
L.E. Schwartz, A globally convergent algorithm for nonlinear least squares 667
R. Sibson, D_A-optimality and duality 677
Z. Šidák, A chain of inequalities for some types of multivariate distributions 693
R.S. Silverman – A. Nádas, Optimal tests for the non-existence of immortals 701
A. Simonovits, On discretionary queuing discipline 725
A.N. Širjaev, Statistics of diffusion processes 737
J. Stene, Hierarchical procedures 753
J. Štěpán, Probability limit identification function 765
M. Stone, Large deviation connections 769
J.M. Stoyanov, Optimal estimation of some stochastic processes by incomplete data 773
D.O.H. Szász, On the rate of convergence in Levy's metric for random indiced sums 781

G.J. Székely, Statistical theory of topological groups 789
W.Y. Tan – I. Guttman, A Bayesian approach to the comparison of sensitivities of two experiments 793
J. Tankó, A simple algorithm to determine the ergodic classes of a Markov chain 803
E. Thorp – R. Whitley, Concave utilities are distingushed by their optimal strategies 813
P. Thyregod, Bayesian single sampling acceptance plans for life-testing 831
J. Tomkó, On the rarefaction of multivariate processes 843
V. Tzonev, Contribution to Girault's lecture 861
K. Urbanik, On the concept of information 863
I. Vincze, On the maximum probability principle in statistical physics 869
K.W. Wachter, Exchangeability and asymptotic random matrix spectra 895
T. Williams, The diffusion approximation to a branching process ... 909
